SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

PART 723—CIGAR-FILLER (TYPE 41) AND MARYLAND TOBACCO

Subpart—Proclamations, Determinations, and Announcements of National Marketing Quotas and Referendum Results

PROCLAMATION OF QUOTAS

- Sec.
723.1 Cigar-filler (type 41) tobacco—1971-72, 1972-73, and 1973-74 Marketing Years.
723.2 Maryland Tobacco—1971-72, 1972-73, and 1973-74 Marketing Years.

DETERMINATIONS AND ANNOUNCEMENTS—1971-72 MARKETING YEAR

- 723.11 Cigar-filler (type 41) tobacco.
723.12 Maryland tobacco.

AUTHORITY: The provisions of this subpart are issued under secs. 301, 312, 313, 375, 52 Stat. 38, as amended, 46, as amended, 47, as amended, 66, as amended; 7 U.S.C. 1301, 1312, 1313, 1375.

Basis and purpose. Sections 723.1 and 723.2 are issued pursuant to, and in accordance with, the Agricultural Adjustment Act of 1938, as amended, hereinafter referred to as the "Act", to proclaim national marketing quotas for Cigar-filler (type 41) and Maryland tobacco for each of the 3 marketing years beginning October 1, 1971, October 1, 1972, and October 1, 1973. The material previously appearing in these sections under Subpart—Proclamation of a National Marketing Quota for Cigar-Filler (Type 41) Tobacco for Each of the 3 Marketing Years Beginning October 1, 1968, October 1, 1969, and October 1, 1970; and Determinations and Announcement of the National Marketing Quota, National Acreage Allotment, National Acreage Factor for Apportioning the National Acreage Allotment (Less Reserve) to Old Farms, and the amount of the National Reserve and Parts Thereof Available for (a) 1968 New Farm Allotments, and (b) Making Corrections and Adjusting Inequities in 1968 Old Farm Allotments for Cigar-Filler (Type 41) Tobacco for the 1968-69 Marketing Year remain in full force and effect for the crops to which it was applicable. Sections 723.11 and 723.12 are also issued pursuant to the Act to determine the reserve supply level and the total supply of each kind of tobacco for the marketing year beginning October 1, 1970; to announce for the 1971-72 marketing year the amounts of the national marketing quotas, national acreage allotments, national acreage factors for ap-

portioning the national acreage allotments (less reserves), to old farms, and the amounts of the national reserves and parts thereof available for (a) new farms and (b) making corrections and adjusting inequities in old farm allotments for such kinds of tobacco. The determinations contained in §§ 723.11 and 723.12 have been made on the basis of the latest available statistics of the Federal Government, and after due consideration of data, views, and recommendations received from Cigar-filler (type 41) and Maryland tobacco producers and others as provided in a notice (35 F.R. 18400) given in accordance with the provisions of 5 U.S.C. 553.

Since the Act requires the holding of separate referenda of Cigar-filler (type 41) and Maryland tobacco producers within 30 days after issuance of the proclamation of national marketing quotas for such kinds of tobacco to determine whether such producers favor marketing quotas, since such farmers must be notified, insofar as practicable, of their farm acreage allotments prior to the referenda and since notices of allotments cannot be mailed until the issuance of the proclamations herein, it is hereby found that compliance with the 30-day effective date provision of 5 U.S.C. 553 is impracticable and contrary to the public interest. Therefore, the proclamations, determinations and announcements contained herein shall become effective upon the date of filing with the Director, Office of the Federal Register.

PROCLAMATION OF QUOTAS

§ 723.1 Cigar-filler (type 41) tobacco—1971-72, 1972-73, and 1973-74 marketing years.

Since the 1970-71 marketing year is the last of 3 consecutive years for which marketing quotas previously proclaimed were disapproved by producers of Cigar-filler (type 41) tobacco in a referendum, and since producers of such kind of tobacco had disapproved national marketing quotas on such kind of tobacco in referenda held in 3 successive years subsequent to 1952, section 312(a)(4) of the Act requires the proclamation of a national marketing quota for each of the 3 marketing years beginning October 1, 1971, October 1, 1972, and October 1, 1973; and each such quota is hereby proclaimed.

§ 723.2 Maryland tobacco—1971-72, 1972-73, and 1973-74 marketing years.

Since the 1970-71 marketing year is the last of the 3 consecutive years for which marketing quotas previously proclaimed were disapproved by producers of Maryland tobacco in a referendum, and since producers of such kind of tobacco had disapproved national marketing quotas on such kind of tobacco in referenda held in 3 successive years subsequent to 1952, section 312(a)(4) of the Act re-

quires the proclamation of a national marketing quota for each of the 3 marketing years beginning October 1, 1971, October 1, 1972, and October 1, 1973; and each such quota is hereby proclaimed.

DETERMINATIONS AND ANNOUNCEMENTS—1971-72 MARKETING YEAR

§ 723.11 Cigar-filler tobacco.

(a) **Reserve supply level.**¹ The reserve supply level for Cigar-filler (type 41) tobacco is 132.9 million pounds, calculated, as provided in the Act, from a normal year's domestic consumption of 45.6 million pounds and a normal year's exports of 0.7 million pounds.

(b) **Total supply.**¹ The total supply of Cigar-filler (type 41) tobacco for the marketing year beginning October 1, 1970, calculated in accordance with the Act, is 131.5 million pounds, consisting of carryover of 97.3 million pounds and estimated 1970 production of 34.2 million pounds.

(c) **Carryover.**¹ The estimated carryover of Cigar-filler (type 41) tobacco for the marketing year beginning October 1, 1971, is 88.5 million pounds, calculated in accordance with the Act by subtracting the estimated disappearance for the marketing year beginning October 1, 1970, of 43 million pounds from the total supply of such tobacco.

(d) **National marketing quota.**¹ The amount of Cigar-filler (type 41) tobacco which will make available during the marketing year beginning October 1, 1971, a supply of Cigar-filler (type 41) tobacco equal to the reserve supply level of such tobacco is 44.4 million pounds, and a national marketing quota of such amount is hereby announced.

(e) **National acreage allotment.** The national acreage allotment, calculated in accordance with the Act by dividing the national marketing quota for the 1971-72 marketing year by the 5-year, 1966-70, national average yield of 1,790 pounds, is 24,804.46 acres.

(f) **National acreage factor.** The national acreage factor for use in determining farm acreage allotments for the 1971-72 marketing year is 1. It was calculated in accordance with the Act by dividing the national acreage allotment, less reserve, by the total of the 1971 preliminary allotments for 1971 old farms.

(g) **National reserve.** The national acreage reserve is 248.04 acres, of which 25 acres are made available for 1971 new farms, and 223.04 acres are made available for making corrections and adjusting inequities in old farm allotments.

§ 723.12 Maryland tobacco.

(a) **Reserve supply level.**¹ The reserve supply level for Maryland tobacco is 93.9 million pounds, calculated as provided in the Act, from a normal year's domestic consumption of 25.3 million pounds and

¹ See footnote at end of docket.

a normal year's exports of 12 million pounds.

(b) *Total supply.*¹ The total supply of Maryland tobacco for the marketing year beginning October 1, 1970, calculated in accordance with the Act, is 80 million pounds consisting of estimated carryover of 53 million pounds and estimated 1970 production of 27 million pounds.

(c) *Carryover.*¹ The estimated carryover of Maryland tobacco for the 1971-72 marketing year is 43 million pounds, calculated in accordance with the Act by subtracting the estimated disappearance of 37 million pounds for the 1970-71 marketing year from the total supply of such tobacco.

(d) *National marketing quota.*¹ The amount of Maryland tobacco which will make available during the 1971-72 marketing year, a supply of Maryland tobacco equal to the reserve supply level of such tobacco is 50.9 million pounds, and a national marketing quota of such amount is hereby announced.

(e) *National acreage allotment.* The national acreage allotment, calculated in accordance with the Act by dividing the national marketing quota for the 1971-72 marketing year by the 5-year 1966-70 national average yield of 1,033 pounds, is 49,273.95 acres.

(f) *National acreage factor.* The national acreage factor for use in determining farm acreage allotments for the 1971-72 marketing year is 1.40. It was calculated in accordance with the Act by dividing the national acreage allotment, less reserve, by the total of the 1971 preliminary allotments for 1971 old farms.

(g) *National reserve.* The national acreage reserve is 492.73 acres, of which 20 acres are made available for 1971 new farms, and 472.73 acres are made available for making corrections and adjusting inequities in old farm allotments.

Effective date: Date of filing of this document with the Director, Office of the Federal Register.

Signed at Washington, D.C., on January 29, 1971.

J. PHIL CAMPBELL,
Acting Secretary.

PROCLAMATION OF QUOTAS

Sec.
724.5 Virginia sun-cured tobacco—1971-72, 1972-73, and 1973-74 marketing years.

¹ Rounded to the nearest tenth of a million pounds.

DETERMINATIONS AND ANNOUNCEMENTS—1971-72 MARKETING YEAR

Sec.
724.12 Fire-cured (type 21) tobacco.
724.13 Fire-cured (types 22-24) tobacco.
724.14 Dark air-cured tobacco.
724.15 Virginia sun-cured tobacco.

AUTHORITY: The provisions of this subpart are issued under secs. 301, 312, 313, 375, 52 Stat. 38, as amended, 46, as amended, 47, as amended, 66, as amended; 7 U.S.C. 1301, 1312, 1313, 1375.

Basis and purpose. Section 724.5 is issued pursuant to, and in accordance with, the Agricultural Adjustment Act of 1938, as amended, hereinafter referred to as the "Act", to proclaim a national marketing quota for Virginia sun-cured tobacco for each of the three marketing years beginning October 1, 1971, October 1, 1972, and October 1, 1973. Sections 724.12 through 724.15 are also issued pursuant to the Act to determine the reserve supply level and the total supply of each kind of tobacco for the marketing year beginning October 1, 1970; to announce for the 1971-72 marketing year the amounts of the national marketing quotas, national acreage allotments, national acreage factors for apportioning the national acreage allotments (less reserves) to old farms, and the amounts of the national reserves and parts thereof available for (a) new farms and (b) making corrections and adjusting inequities in old farm allotments for Fire-cured (type 21), Fire-cured (types 22-24), Dark air-cured, and Virginia sun-cured tobacco. The material previously appearing in these sections under centerhead Determinations and Announcements—1970-71 Marketing Year remain in full force and effect as to the crop to which it was applicable.

The determinations contained in §§ 724.12 through 724.15 have been made on the basis of the latest available statistics of the Federal Government, and after due consideration of data, views, and recommendations received from Fire-cured (type 21), Fire-cured (types 22-24), Dark air-cured, and Virginia sun-cured tobacco producers and others as provided in a notice (35 F.R. 18400) given in accordance with the provisions of 5 U.S.C. 553.

It is determined that acreage-poundage quotas will not be announced for the 1971-72 marketing year for Fire-cured (type 21), Fire-cured (types 22-24), or Dark air-cured tobacco.

Since tobacco farmers are now making their plans for producing tobacco in 1971 and need to know, at the earliest possible date, the applicable 1971 tobacco allotments for their farms, and since the Act requires the holding of a referendum of Virginia sun-cured tobacco producers within 30 days after issuance of the proclamation of national marketing quotas for this kind of tobacco to determine whether such producers favor quotas, and the Act requires, insofar as practicable, the mailing of farm allotment notices to farmers prior to the referendum, it is hereby found that compliance with the 30-day effective date provision of 5 U.S.C. 553 is impracticable and contrary to the public interest. Therefore, the determinations and an-

nouncements contained herein shall become effective upon the date of filing with the Director, Office of the Federal Register.

PROCLAMATION OF QUOTAS

§ 724.5 Virginia sun-cured tobacco—1971-72, 1972-73, and 1973-74 marketing years.

Since the 1970-71 marketing year is the last of 3 consecutive years for which marketing quotas previously proclaimed will be in effect for Virginia sun-cured tobacco, a national marketing quota for such tobacco for each of the 3 marketing years beginning October 1, 1971, October 1, 1972, and October 1, 1973, is hereby proclaimed.

DETERMINATIONS AND ANNOUNCEMENTS—1971-72 MARKETING YEAR

§ 724.12 Fire-cured (type 21) tobacco.

(a) *Reserve supply level.*¹ The reserve supply level for Fire-cured (type 21) tobacco is 21,729,000 pounds, calculated, as provided in the Act, from a normal year's domestic consumption of 3,745,000 pounds and a normal year's exports of 6,300,000 pounds.

(b) *Total supply.*¹ The total supply of Fire-cured (type 21) tobacco for the marketing year beginning October 1, 1970, is 16,297,000 pounds, calculated in accordance with the Act, from a carryover of 9,797,000 pounds and estimated 1970 production of 6,500,000 pounds.

(c) *Carryover.*¹ The estimated carryover of Fire-cured (type 21) tobacco for the marketing year beginning October 1, 1971, is 8,297,000 pounds, calculated in accordance with the Act by subtracting the estimated disappearance for the marketing year beginning October 1, 1970, of 8 million pounds from the total supply of such tobacco.

(d) *National marketing quota.*¹ The amount of Fire-cured (type 21) tobacco which will make available during the marketing year beginning October 1, 1971, a supply of Fire-cured (type 21) tobacco equal to the reserve supply level of such tobacco is 13,432,000 pounds, and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 13,432,000 pounds would result in undue restriction of marketings during the 1971-72 marketing year and such amount is hereby increased by 20 percent. Therefore, the amount of the national marketing quota for Fire-cured (type 21) tobacco in terms of the total quantity of such tobacco which may be marketed during the marketing year beginning October 1, 1971, is 16,118,000 pounds.

(e) *National acreage allotment.* The national acreage allotment, calculated in accordance with the Act by dividing the national marketing quota for the 1971-72 marketing year by the 5-year 1966-70 national average yield of 1,278 pounds is 12,611.89 acres.

(f) *National acreage factor.* The national acreage factor for use in determining farm acreage allotments is 1.10. It was calculated in accordance with the Act by dividing the national acreage allotment, less reserve, by the total of the

See footnote at end of docket.

1971 preliminary allotments for 1971 old farms.

(g) *National reserve.* The national acreage reserve is 126.11 acres, of which 10 acres are made available for 1971 old farms, and 116.11 acres are made available for making corrections and adjusting inequities in old farm allotments.

§ 724.13 Fire-cured (types 22-24) tobacco.

(a) *Reserve supply level.*² The reserve supply level for Fire-cured (types 22-24) tobacco is 98 million pounds, calculated, as provided in the Act, from a normal year's domestic consumption of 18.8 million pounds and a normal year's exports of 25.2 million pounds.

(b) *Total supply.*² The total supply of Fire-cured (types 22-24) tobacco for the marketing year beginning October 1, 1970, is 96.7 million pounds, calculated in accordance with the Act, from a carryover of 63.8 million pounds and estimated 1970 production of 32.9 million pounds.

(c) *Carryover.*² The estimated carryover of Fire-cured (types 22-24) tobacco for the marketing year beginning October 1, 1971, is 56.7 million pounds, calculated in accordance with the Act by subtracting the estimated disappearance for the marketing year beginning October 1, 1970, of 40 million pounds from the total supply of such tobacco.

(d) *National marketing quota.*² The amount of Fire-cured (types 22-24) tobacco which will make available during the marketing year beginning October 1, 1971, a supply of Fire-cured (types 22-24) tobacco equal to the reserve supply level of such tobacco is 41.3 million pounds, and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 41.3 million pounds would result in undue restriction of marketings during the 1971-72 marketing year and such amount is hereby increased by 20 percent. Therefore, the amount of the national marketing quota for Fire-cured (types 22-24) tobacco in terms of the total quantity of such tobacco which may be marketed during the marketing year beginning October 1, 1971, is 49.6 million pounds.

(e) *National acreage allotment.* The national acreage allotment, calculated in accordance with the Act by dividing the national marketing quota for the 1971-72 marketing year by the 5-year 1966-70 national average yield of 1,817 pounds is 27,297.74 acres.

(f) *National acreage factor.* The national acreage factor for use in determining farm acreage allotments for the 1971-72 marketing year is 1. It was calculated in accordance with the Act by dividing the national acreage allotment, less reserve, by the total of the 1971 preliminary allotments for 1971 old farms.

(g) *National reserve.* The national acreage reserve is 272.97 acres, of which 20 acres are made available for 1971 new farms, and 252.97 acres are made available for making corrections and adjusting inequities in old farm allotments.

§ 724.14 Dark air-cured tobacco.

(a) *Reserve supply level.*² The reserve supply level for Dark air-cured tobacco

is 67.4 million pounds, calculated, as provided in the Act, from a normal year's domestic consumption of 21.3 million pounds and a normal year's exports of 3.4 million pounds.

(b) *Total supply.*² The total supply of Dark air-cured tobacco for the marketing year beginning October 1, 1970, is 69.7 million pounds calculated in accordance with the Act, from a carryover of 53.7 million pounds and estimated 1970 production of 16 million pounds.

(c) *Carryover.*² The estimated carryover of Dark air-cured tobacco for the marketing year beginning October 1, 1971, is 50.1 million pounds, calculated in accordance with the Act by subtracting the estimated disappearance for the marketing year beginning October 1, 1970, of 19.6 million pounds from the total supply of such tobacco.

(d) *National marketing quota.*² The amount of Dark air-cured tobacco which will make available during the marketing year beginning October 1, 1971, a supply of Dark air-cured tobacco equal to the reserve supply level of such tobacco is 17.3 million pounds, and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 17.3 million pounds would result in undue restriction of marketings during the 1971-72 marketing year and such amount is hereby increased by 20 percent. Therefore, the amount of the national marketing quota for Dark air-cured tobacco in terms of the total quantity of such tobacco which may be marketed during the marketing year beginning October 1, 1971, is 20.8 million pounds.

(e) *National acreage allotment.* The national acreage allotment, calculated in accordance with the Act by dividing the national marketing quota for the 1971-72 marketing year by the 5-year, 1966-70, national average yield of 1,824 pounds, is 11,403.50 acres.

(f) *National acreage factor.* The national acreage factor for use in determining farm acreage allotments for the 1971-72 marketing year is 1. It was calculated in accordance with the Act by dividing the national acreage allotment, less reserve, by the total of the 1971 preliminary allotments for 1971 old farms.

(g) *National reserve.* The national acreage reserve is 114.03 acres, of which 14 acres are made available for 1971 new farms, and 100.03 acres are made available for making corrections and adjusting inequities in old farm allotments.

§ 724.15 Virginia sun-cured tobacco.

(a) *Reserve supply level.*² The reserve supply level for Virginia sun-cured tobacco is 5,156,000 pounds, calculated, as provided in the Act, from a normal year's domestic consumption of 1,591,000 pounds and a normal year's exports of 324,000 pounds.

(b) *Total supply.*¹ The total supply of Virginia sun-cured tobacco for the marketing year beginning October 1, 1970, calculated in accordance with the Act, is 4,477,000 pounds, consisting of carryover of 3,327,000 pounds and estimated 1970 production of 1,150,000 pounds.

(c) *Carryover.*¹ The estimated carryover of Virginia sun-cured tobacco for the marketing year beginning October 1, 1971, is 3,077,000 pounds, calculated in accordance with the Act by subtracting the estimated disappearance for the marketing year beginning October 1, 1970, of 1,400,000 pounds from the total supply of such tobacco.

(d) *National marketing quota.*¹ The amount of Virginia sun-cured tobacco which will make available during the marketing year beginning October 1, 1971, a supply of sun-cured tobacco equal to the reserve supply level of such tobacco is 2,079,000 pounds, and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 2,079,000 pounds would result in undue restriction of marketings during the 1971-72 marketing year and such amount is hereby increased by 20 percent. Therefore, the amount of the national marketing quota for Virginia sun-cured tobacco in terms of the total quantity of such tobacco which may be marketed during the marketing year beginning October 1, 1971, is 2,495,000 pounds.

(e) *National acreage allotment.* The national acreage allotment, calculated in accordance with the Act by dividing the national marketing quota for the 1971-72 marketing year by the 5-year, 1966-70, national average yield of 1,125 pounds, is 2,217.77 acres.

(f) *National acreage factor.* The national acreage factor for use in determining farm acreage allotments for the 1971-72 marketing year is 1. It was calculated in accordance with the Act by dividing the national acreage allotment, less reserve, by the total of the 1971 preliminary allotments for 1971 old farms.

(g) *National reserve.* The national acreage reserve is 22.17 acres, of which 5 acres are made available for 1971 new farms, and 17.17 acres are made available for making corrections and adjusting inequities in old farm allotments.

PART 724—BURLEY, FIRE-CURED, DARK AIR-CURED, VIRGINIA SUN-CURED, CIGAR-BINDER (TYPES 51 AND 52), CIGAR-FILLER AND BINDER (TYPES 42, 43, 44, 53, 54, AND 55), AND MARYLAND TOBACCO

Determinations and Announcements—1971-72 Marketing Year

- Sec.
724.16 Cigar-binder (types 51 and 52) tobacco.
724.17 Cigar filler and binder (types 42, 43, 44, 53, 54, and 55) tobacco.

¹ Rounded to the nearest thousand pounds.
² Rounded to the nearest tenth of a million.

AUTHORITY: The provisions of this subpart are issued under secs. 301, 312, 313, 375, 52 Stat. 38, as amended, 46, as amended, 47, as amended, 66, as amended; 7 U.S.C. 1301, 1312, 1313, 1375.

Basis and purpose. Sections 724.16 and 724.17 are issued pursuant to, and in accordance with, the Agricultural Adjustment Act of 1938, as amended, herein-after referred to as the "Act", to (1) determine the reserve supply levels for cigar binder (types 51 and 52) and cigar filler and binder (types 42-44, 53-55) tobacco, (2) determine the total supply of each of such two kinds of tobacco for the marketing year beginning October 1, 1971, and (3) announce for the 1971-72 marketing year the amounts of the national marketing quotas, national acreage allotments, national acreage factors for apportioning the national acreage allotments (less reserves) to old farms, and the amounts of the national reserves and parts thereof available for (a) new farms and (b) making corrections and adjusting inequities in old farm allotments for each of these two kinds of tobacco.

The material previously appearing in these sections under centerhead Determinations and Announcements—1970-71 Marketing Year remain in full force and effect as to the crop to which it was applicable.

The determinations contained in §§ 724.16 and 724.17 have been made on the basis of the latest available statistics of the Federal Government, and after due consideration of data, views, and recommendations received from cigar binder (types 51 and 52) and cigar filler and binder (types 42-44, 53-55) tobacco producers and others as provided in a notice (35 F.R. 18400) given in accordance with the provisions of 5 U.S.C. 553.

It is determined that acreage-poundage quotas for these kinds of tobacco will not be announced for the 1971-72 marketing year. Since cigar tobacco farmers are now making their plans for producing tobacco in 1971 and need to know, at the earliest possible date, the applicable 1971 tobacco allotments for their farms, it is hereby found that compliance with the 30-day effective date provision of 5 U.S.C. 553 is impracticable and contrary to the public interest. Therefore, the determinations and announcements contained herein shall become effective upon the date of filing with the Director, Office of the Federal Register.

§ 724.16 Cigar binder (types 51 and 52) tobacco.

(a) **Reserve supply level.**¹ The reserve supply level for cigar binder (types 51 and 52) tobacco is 17.1 million pounds, calculated, as provided in the Act, from a normal year's domestic consumption of 5.2 million pounds and a normal year's exports of 1.2 million pounds.

(b) **Total supply.**¹ The total supply of Cigar binder (types 51 and 52) tobacco for the marketing year beginning October 1, 1970, is 10.1 million pounds, calculated in accordance with the Act, from a carryover of 7 million pounds and estimated 1970 production of 3.1 million pounds.

(c) **Carryover.**¹ The estimated carryover of Cigar binder (types 51 and 52) tobacco for the marketing year beginning October 1, 1971, is 6.3 million pounds, calculated in accordance with the Act by subtracting the estimated disappearance for the marketing year beginning October 1, 1970, of 3.8 million pounds from the total supply of such tobacco.

(d) **National marketing quota.**¹ The amount of Cigar binder (types 51 and 52) tobacco which will make available during the marketing year beginning October 1, 1971, a supply of Cigar binder (types 51 and 52) tobacco equal to the reserve supply level of such tobacco is 10.8 million pounds, and a national marketing quota of such amount is hereby announced.

(e) **National acreage allotment.** The national acreage allotment, calculated in accordance with the Act by dividing the national marketing quota for the 1971-72 marketing year by the 5-year, 1966-70 national average yield of 1,804 pounds is 5,986.69 acres.

(f) **National acreage factor.** The national acreage factor for use in determining farm acreage allotments for the 1971-72 marketing year is 1.10. It was calculated in accordance with the Act by dividing the national acreage allotment, less reserve, by the total of the 1971 preliminary allotments for 1971 old farms.

(g) **National reserve.** The national acreage reserve is 59.86 acres, of which 48 acres are made available for 1971 new farms, and 11.86 acres are made available for making corrections and adjusting inequities in old farm allotments.

§ 724.17 Cigar filler and binder (types 42-44, 53-55) tobacco.

(a) **Reserve supply level.**¹ The reserve supply level for Cigar filler and binder (types 42-44, 53-55) tobacco is 66.9 million pounds, calculated, as provided in the Act, from a normal year's domestic consumption of 22.9 million pounds and a normal year's exports of 0.4 million pounds.

(b) **Total supply.**¹ The total supply of Cigar filler and binder (types 42-44, 53-55) tobacco for the marketing year beginning October 1, 1970, is 64 million pounds calculated in accordance with the Act, from a carryover of 44.3 million pounds and estimated 1970 production of 19.7 million pounds.

(c) **Carryover.**¹ The estimated carryover of Cigar filler and binder (types 42-44, 53-55) tobacco for the marketing year beginning October 1, 1971, is 39 million pounds, calculated in accordance with the Act, by subtracting the estimated disappearance for the marketing year beginning October 1, 1970, of 25 million pounds from the total supply of such tobacco.

(d) **National marketing quota.**¹ The amount of Cigar filler and binder (types 42-44, 53-55) tobacco which will make available during the marketing year beginning October 1, 1971, a supply of Cigar filler and binder (types 42-44, 53-55) tobacco equal to the reserve supply level

¹ Rounded to the nearest tenth of a million.

of such tobacco is 27.9 million pounds, and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 27.9 million pounds would result in undue restriction of marketings during the 1971-72 marketing year and such amount is hereby increased by 20 percent. Therefore, the amount of the national marketing quota for Cigar filler and binder (types 42-44, 53-55) tobacco in terms of the total quantity of such tobacco which may be marketed during the marketing year beginning October 1, 1971, is 33.5 million pounds.

(e) **National acreage allotment.** The national acreage allotment, calculated in accordance with the Act by dividing the national marketing quota for the 1971-72 marketing year by the 5-year, 1966-70, national average yield of 1,813 pounds, is 18,477.66 acres.

(f) **National acreage factor.** The national acreage factor for use in determining farm acreage allotments for the 1971-72 marketing year is 1. It was calculated in accordance with the Act by dividing the national acreage allotment, less reserve, by the total of the 1971 preliminary allotments for 1971 old farms.

(g) **National reserve.** The national acreage reserve is 184.77 acres, of which 148 acres are made available for 1971 new farms, and 36.77 acres are made available for making corrections and adjusting inequities in old farm allotments.

[Navel Orange Reg. 224]

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

§ 907.524 Navel Orange Regulation 224.

(a) **Findings.** (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907, 35 F.R. 16359), regulating the handling of Navel oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under the said

amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this regulation effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on February 2, 1971.

(b) Order. (1) The respective quantities of Navel oranges grown in Arizona and designated part of California which may be handled during the period February 5, 1971, through February 11, 1971, are hereby fixed as follows:

- (i) District 1: 750,000 cartons;
- (ii) District 2: 250,000 cartons;
- (iii) District 3: Unlimited.

(2) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" have the same meaning as when used in said amended marketing agreement and order.

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1970 and Subsequent Crops Oats Loan and Purchase Program

WAREHOUSE CHARGES

The regulations issued by the Commodity Credit Corporation published in the FEDERAL REGISTER at 35 F.R. 8340, containing provisions for price support loans and purchases applicable to the 1970 and Subsequent crops of oats are amended as follows:

Section 1421.252 is revised to delete all references in paragraph (a) relating to approved warehouses operated by eastern common carriers under tariffs approved by the Interstate Commerce Commission and to delete paragraph (c) which relates to warehouses operated by eastern common carriers. The revised section reads as follows:

§ 1421.252 Warehouse charges.

(a) Handling and storage liens. Warehouse receipts and the oats represented thereby stored in an approved warehouse operating under the Uniform Grain Storage Agreement (hereinafter called "UGSA") may be subject to liens for warehouse handling and storage charges at not to exceed the UGSA rates from the date the oats are deposited in the warehouse for storage. In no event shall a warehouseman be entitled to satisfy the

lien by sale of the oats when CCC is holder of the warehouse receipt.

(b) *Deduction of storage charges UGSA warehouses.* The table set forth in the annual crop year supplement will provide the deduction for storage charges to be made from the amount of the loan or purchase price in the case of oats stored in an approved warehouse operated under the UGSA. Such deduction shall be based on entries shown on the warehouse receipts. If written evidence is submitted with the warehouse receipt that all the warehouse charges except receiving and loading out charges have been prepaid through the applicable loan maturity date, no storage deduction shall be made. If such written evidence is not submitted, the beginning date to be used for computing the storage deduction on oats stored in warehouses operating under the UGSA shall be the latest of the following: (1) The date the oats were received or deposited in the warehouse, (2) the date storage charges start, or (3) the day following the date through which storage charges have been paid.

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Administration, Department of Transportation

[Airworthiness Docket No. 70-WE-37-AD; Amdt. 39-1151]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing Model 707 and 720 Series Airplanes

Amendment 39-1101, 35 F.R. 16791, AD 70-22-8, requires a visual inspection and rework of the elevator aft control quadrant in accordance with Boeing Telegraphic Alert Service Bulletin 3003, dated October 16, 1970, on Boeing Model 707 and 720 Series airplanes. After issuing Amendment 39-1101, the Boeing Co. issued Revision 2, dated January 15, 1971, to the Service Bulletin, which Revision provides for additional inspections at specified intervals to assure elevator aft quadrant integrity. The agency has determined that the additional inspections recommended in the Revision must be accomplished to assure adequate elevator aft quadrant integrity. Therefore, the AD is being superseded by a new AD that requires repetitive inspections

of the elevator aft quadrant for corrosion and cracks and torque tube ovalness, until modified in accordance with the manufacturer's Service Bulletin.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 F.R. 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

BOEING. Applies to Model 707 and 720 series airplanes listed in Boeing Service Bulletin 3003, Revision 2, dated January 15, 1971, or later FAA-approved revisions.

Compliance required as indicated after the effective date of this AD.

To assure elevator aft quadrant integrity, accomplish the following inspections and rework or the equivalent inspections and rework approved by the Chief, Aircraft Engineering Division, FAA Western Region.

(a) Within the next 15 hours' time in service unless already accomplished per Telegraphic Alert Service Bulletin 3003 dated October 16, 1970, or AD 70-22-8, perform a close visual inspection of the elevator aft control quadrant hub aft flange face and central web area for corrosion and cracks per Part I of Boeing Service Bulletin 3003, Revision 2, dated January 15, 1971, or later FAA-approved revisions. If cracks are found, replace quadrant per paragraph (d).

(b) Within the next 750 hours' time in service unless already accomplished, inspect the aft flange face and central web of the elevator aft quadrant for corrosion and cracks per Parts I and II of Boeing Service Bulletin 3003, Revision 2, or later FAA-approved revisions. Accomplish a micrometer check of the quadrant torque tube diameter for ovalness in both the "x" and "y" axes as shown in Fig. 1 of Boeing Service Bulletin 3003, Revision 2, or later FAA-approved revisions.

(1) If the torque tube is either round or oval within limits per Part II of Boeing Service Bulletin 3003, Revision 2, or later FAA-approved revisions, perform periodic close visual inspections at intervals not to exceed 750 hours' time in service. On or before 1,500 hours' time in service, initiate the dye penetrant or eddy current and torque check inspection program per Part III of Boeing Service Bulletin 3003, Revision 2, or later FAA-approved revisions. The quadrant assembly may be retained in service under dye penetrant or eddy current inspection surveillance at intervals not to exceed 1,500 hours' time in service until it is either replaced or overhauled per (c).

(2) If the torque tube exceeds the limits of ovalness specified in Part II of Boeing Service Bulletin 3003, Revision 2, or later FAA-approved revisions, conduct a dye penetrant or eddy current inspection and torque check per Part IV of Boeing Service Bulletin 3003, Revision 2, or later FAA-approved revisions prior to further flight.

(3) If, after performing the inspection and torque check per (2) above, the torque tube diameter difference is less than 0.004, the quadrant assembly may be retained in service under dye penetrant or eddy current inspection surveillance at intervals not to exceed 1,500 hours' time in service until it is either replaced per (d) or overhauled per (c).

(4) If, after completing the inspection and torque check per (2) above, the torque tube

dimensional difference is still greater than 0.004, replace the quadrant assembly per (d).

(c) On or before 12,000 hours' time in service unless already accomplished, overhaul or replace the quadrant assembly per Part V of Boeing Service Bulletin 3003, Revision 2, or later FAA-approved revisions.

(d) If, as a result of any of the foregoing inspections, the quadrant assembly shows signs of cracks, or the torque tube ovalness is beyond limits after the torque check, replace the quadrant assembly prior to further flight with either an "Existing" quadrant assembly reworked in accordance with Part V of Boeing Service Bulletin 3003, Revision 2, or later FAA-approved revisions, or by an "Equivalent" new quadrant assembly as identified in table II of Boeing Service Bulletin 3003, Revision 2, or later FAA-approved revisions.

(e) The inspections required by this AD may be discontinued upon replacement of the aft quadrant assembly by an "Existing" quadrant assembly reworked in accordance with Part V of the Boeing Service Bulletin 3003, Revision 2, or later FAA-approved revisions, or by an "Equivalent" new quadrant assembly as identified in table II of Boeing Service Bulletin 3003, Revision 2, or later FAA-approved revisions.

This amendment supersedes Amendment 39-1101, 35 F.R. 16791, AD 70-22-8.

This amendment becomes effective February 13, 1971.

Confirmation of Effective Date of Order Repealing Provision for Certifications of Certain Topical Dental Antibiotic Drugs

An order was published in the FEDERAL REGISTER of October 7, 1970 (35 F.R. 15749), amending the antibiotic drug regulations to repeal provisions for certification of penicillin dental cones (calcium penicillin dental cones, penicillin dental cones calcium salt, crystalline penicillin dental cones); penicillin-streptomycin dental cones; penicillin-dihydrostreptomycin dental cones; penicillin-streptomycin-bacitracin dental paste; penicillin-dihydrostreptomycin-bacitracin dental paste; streptomycin-chlortetracycline - chloramphenicol - bacitracin dental cement; and dihydrostreptomycin - chlortetracycline-chloramphenicol-bacitracin dental cement. The order revoked §§ 141a.13, 141a.50, 141a.59, 141b.127, 146a.31, 146a.71, 146a.82, and 146b.122, and all antibiotic certificates issued thereunder.

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 502, 507, 52 Stat. 1050-51, as amended, 59 Stat. 463, as amended; 21 U.S.C. 352, 357) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120), notice is given that no objections were filed to the above-identified order. Accordingly, the amendments pro-

mulgated thereby became effective November 16, 1970.

Firms affected by the order will be allowed 30 days after publication hereof in the FEDERAL REGISTER to recall outstanding stocks of the affected drugs. Certification of new stocks has been discontinued.

Chapter II—Federal Housing Administration, Department of Housing and Urban Development

SUBCHAPTER N—PROJECTS FOR LOWER INCOME FAMILIES

PART 236—MORTGAGE INSURANCE AND INTEREST REDUCTION PAYMENTS

Subpart A—Eligibility Requirements for Mortgage Insurance

MISCELLANEOUS AMENDMENTS

The following amendments have been made to section 236 in order to implement the "Housing and Urban Development Act of 1970" (Public Law 91-609) and to eliminate the preference for displacees in projects designed for elderly or handicapped persons, except for displacees who are within those categories. The amendments provide that: (1) A displaced single person is an eligible tenant; (2) in projects designed for displaced, elderly, or handicapped persons, occupancy may be restricted to that category of persons for whom the project was designed; (3) lower income military personnel shall be given such preference for occupancy as the Commissioner determines is appropriate; and (4) in projects designed for elderly or handicapped persons, only those displacees who are within those categories shall be given a preference for occupancy.

1. § 236.2 is amended by adding new paragraphs (f) and (g) as follows:

§ 236.2 Definitions used in this subpart.

(f) "Elderly" means a person 62 years of age or older.

(g) "Displacee" means a person who has been displaced from an urban renewal area, or as a result of governmental action or as a result of a disaster determined by the President to be a major disaster.

2. § 236.70 in its entirety is amended as follows:

§ 236.70 Occupancy requirements.

(a) *Initial occupancy.* Initial occupancy of the project by tenants who are unable to pay the fair market rental shall be restricted to those determined

by the mortgagor as meeting the income requirements established by the Commissioner, and who are one of the following:

- (1) A family.
- (2) An elderly person.
- (3) A displacee.
- (4) A handicapped person.
- (5) A single person who is less than 62 years of age: *Provided*, That occupancy by this category of tenants or members shall be limited to 10 percent of the dwelling units in the project.

(b) *Projects designed for displacees, or elderly, or handicapped.* In a project designed for displacees, or elderly, or handicapped, occupancy may be restricted to that category of persons for whom the project was designed and who meet the income requirements established by the Commissioner.

(c) *Preference for military personnel and displacees.*

(1) Whenever the Commissioner determines that a project, because of its location or other considerations, could ordinarily be expected to substantially serve the family needs of military personnel who are serving on active duty and meet the income requirements established by the Commissioner, such preference for occupancy shall be afforded to the family of such military personnel as the Commissioner determines is appropriate.

(2) In all projects preference or priority to occupy dwelling units shall be given to displacees provided that in a project designed for the handicapped or the elderly, preference for displacees shall be limited to those who are within the category for whom the project was designed.

(d) *Recertification of income.* The mortgagor shall obtain from each tenant or cooperative member who is not paying the fair market rental a biennial recertification of family income.

Sec.
5A-73.123-2 Additions, deletions, or reductions in prices of schedule contract items.

Subpart 5A-73.1—Production and Maintenance

Subpart 5A-73.1 is amended to add a new § 5A-73.123-2, as follows:

§ 5A-73.123-2 Additions, deletions, or reductions in prices of schedule contract items.

(a) The following provision shall be included in all solicitations for new item and multiple award schedule contracts and in each resulting Schedule thereof.

AMENDMENTS

If, during the contract period, the contractor offers any change(s) (i.e., additions, deletions, reductions in price(s), etc.) to the approved pricelist, the contractor shall submit (Insert number) copies of the proposed change(s) and the reasons therefore to the contracting officer for consideration, in the following manner:

(a) *Additional items.* (1) Furnish "Discount Schedule and Marketing Data" information as required with original offer; (2) furnish published dated commercial pricelist on the new items, and effective date of such commercial pricelist; and (3) furnish production point and delivery time on the new items. If the information requested in (1), (2), and (3), above, is the same as that furnished under the original accepted offer, only a statement to that effect is required.

(b) *Deletions.* State reason for requesting deletion. The Government reserves the right to reject any subsequent offer of a substantially equal item at a higher price during the same contract period, if, in the opinion of the contracting officer, the higher price is unreasonable when compared with that of the deleted item.

(c) *Price reduction.* State whether in conformity with (1) Reductions to Customers other than Federal Government, or (2) Reductions to Federal Agencies (see Special Provision entitled "Price Reductions"), and effective date thereof. If type (1) reduction applies, submit copy of dated commercial pricelist.

When instructed by the contracting officer, the contractor agrees to print and distribute supplemental pricelists reflecting accepted changes within 15 days to Government agencies furnished the original pricelist.

(b) The above provision should encourage the acceptance of bona fide offers of items to be added to existing new item and multiple award Federal Supply

Schedule contracts for a limited period of time, such as items offered at reduced prices due to model changeover, the discontinuance of a product line, etc.

Proposed Rule Making

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Parts 175, 176]

ALLOCATION OF STUDENT AID FUNDS TO INSTITUTIONS BY FAMILY IN- COME LEVEL

Proposed Change in Method of Allo- cation of Funds Under College Work-Study Program and Educa- tional Opportunity Grant Program

In view of the importance of the subject rule to current and prospective students and the institutions of higher education that they attend or may be attending, it has been determined that although not required by law, it is appropriate to solicit the widest possible public participation in its formulation. To that end the following notice of proposed rule making follows the procedure of 5 U.S.C. 553.

Notice is hereby given to institutions of higher education which participate in the Educational Opportunity Grant Program (Title IV-A, Higher Education Act of 1965), and the College Work-Study Program (Title IV-C, Higher Education Act of 1965) and other interested parties that the Commissioner of Education proposes to change the method by which funds are to be allocated to such institutions for (1) making initial year awards under the Educational Opportunity Grant Program, and (2) for providing compensation to students for employment under the College Work-Study Program. It is contemplated that these changes would be first effective with respect to the allocation of funds for the fiscal year 1972.

The respective statutes under which these programs are authorized provide that funds shall be allocated to eligible institutions of higher education from their respective State allotments in accordance with criteria established by the Commissioner which are designed to achieve such distribution of such funds as will most effectively carry out the purposes of the legislation (Educational Opportunity Grants, 20 U.S.C. 1066; College Work-Study, 42 U.S.C. 2756).

Under both of these programs participating institutions of higher education file applications for funds with the U.S. Office of Education. These applications take into account the numbers of students eligible for assistance under the terms of the respective programs and include the institutions' estimates as to the amount of funds needed to provide that assistance. The applications are then reviewed for reasonableness by panels appointed by the Office of Edu-

cation for that purpose. Funds are then allocated to each institution on the basis of its panel approved request.

Where funds are insufficient to honor all approved requests, the current procedure for allocating a State's allotment (and reallocation if any) to institutions within that State is to allocate on the basis of the ratio that the funds approved in each application bears to the total amount of funds approved in all applications of institutions within that State. Under the proposed new procedure—the purpose of which is to focus financial aids in the areas of greatest need—College Work-Study and Educational Opportunity Grant funds would be allocated to institutions in proportion to the estimated number of students from low income families who will be in attendance and in need of financial assistance. Under this proposal, funds would first be allocated to institutions within a State on account of those of such students who have annual adjusted gross family incomes of less than \$3,000 per annum. Requests on account of students with annual adjusted gross family incomes of from \$3,000 to \$6,000 would be taken care of next and so on. Reallocations to a State, if any, would be allocated among institutions on the same basis as is the original allotment. In order to assure that a reasonable portion of a State's allotment will be available to all institutions who have entered into agreements with the Commissioner for the conduct of these programs, the proposed procedures assure each institution a minimum or "floor" amount. Assuming its approved request equals or exceeds its approved request for fiscal year 1971 and if its State's allotment (and reallocation if any) equals or exceeds its allotment for the fiscal year 1971, each institution would receive no less in any year than 80 percent of the amount allocated to it from its State's allotment (and reallocation if any) for the fiscal year 1971.

Specifically, the proposed new procedures for allocating funds among institutions of higher education who have in effect an agreement with the Commissioner of Education under section 407(a) and section 443(a) of the Higher Education Act of 1965 for the conduct of an Educational Opportunity Grant Program or a College Work-Study Program respectively, and who have timely filed an application which has been approved by the Commissioner for funds for (1) making initial year awards under the Educational Opportunity Grant Program, and (2) for providing compensation to students for employment under the College Work-Study Program for a particular program year, is as follows:

1. An amount will first be allocated to each institutional applicant from the appropriate State's allotment (or reallocation) equal to the amount reason-

ably estimated to be needed by students whose adjusted gross family income is in the \$0-\$2,999 bracket per annum.

2. From such sums as still remain in a State's allotment (or reallocation), sums will then be allocated to each institutional applicant equal to the amount reasonably estimated to be needed by students whose adjusted gross family income is in the \$3,000-\$5,999 bracket per annum. This procedure will be repeated for students whose adjusted gross family income is between \$6,000-\$7,499 and \$7,500-\$8,999, and with respect to a State's allotment for the College Work-Study Program, between \$9,000-\$11,999 and over \$12,000.

3. Whenever funds available in a State's allotment (or reallocation) are not sufficient to cover all of the institutional requirements in a given adjusted gross family income bracket, such sums as are available will be distributed on a pro rata basis among all institutions in the State according to the ratio that their respective requirements in that bracket bear to the total requirements in that bracket of all institutions in the State.

4. The allocation of funds to any single institution for any year however will be no less than 80 percent of the amount allocated to it for the conduct of each of the subject programs during fiscal year 1971, as reduced on a proportional basis to reflect decreases, if any, in the amount of such institutions' approved application or in the amount of the State's allotment and reallocation for each such program.

5. "Adjusted gross family income" includes in addition to the student's own adjusted gross income (as defined in the Internal Revenue Code), the adjusted gross income of his parents and spouse, if any, except where such income would not be relevant to a determination of such student's financial needs under the method of financial need assessment utilized by the institution concerned in accordance with Schedule A of its agreement with the U.S. Commissioner of Education covering institutional participation in programs of student financial aid.

Interested parties are invited to submit written comments, suggestions, or objections regarding the proposed changes to the Office of the Commissioner of Education, U.S. Office of Education, Washington, D.C. 20202, within 30 days after the date of publication of this notice in the FEDERAL REGISTER.

Dated: January 14, 1971.

S. P. MARLAND, Jr.,
U.S. Commissioner of Education.

Approved: January 29, 1971.

Secretary.

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the description of the Battle Mountain, Nev., transition area.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Airspace and Procedures Branch, Federal Aviation Administration, 5651 West Manchester Avenue, Post Office Box 92007, Worldway Postal Center, Los Angeles, CA 90009. All communications received within 30 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Administration, 5651 West Manchester Avenue, Los Angeles, CA 90045.

The airspace requirements for Lander County Airport, Battle Mountain, Nev., have been reviewed in accordance with criteria contained in U.S. Standard for Terminal Instrument Approach Procedures.

As a result of the review, it has been determined that the 700-foot portion of the transition area may be reduced. In addition, the 1,200-foot portion described on the Battle Mountain VORTAC 084° and 264° radials may be deleted.

In consideration of the foregoing, the FAA proposes the following airspace action.

In § 71.181 (36 F.R. 2140) the description of the Battle Mountain, Nev., transition area is amended to read as follows:

BATTLE MOUNTAIN, NEV.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of Lander County Airport (latitude 40°36'03" N., longitude 116°52'25" W.) and within 5 miles each side of the Battle Mountain VORTAC 218° radial, extending from the VORTAC to 16 miles southwest of the VORTAC; that airspace extending upward from 1,200 feet above the surface within 5

miles southeast and 9.5 miles northwest of the Battle Mountain 218° radial, extending from the VORTAC to 23 miles southwest of the VORTAC, and within 6.5 miles south and 9 miles north of the Battle Mountain VORTAC 077° and 257° radials, extending from 8 miles west to 18.5 miles east of the VORTAC.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Los Angeles, Calif., on January 26, 1971.

CONTROL ZONES AND TRANSITION AREA

Proposed Revocation, Designation, and Alteration

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations to revoke, designate, and alter controlled airspace in the Killeen, Tex., terminal area.

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Air Traffic Division, Southwest Region, Federal Aviation Administration, Post Office Box 1689, Fort Worth, TX 76101. All communications received within 30 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Air Traffic Division. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested persons at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, Fort Worth, Tex. An informal docket will also be available for examination at the Office of the Chief, Air Traffic Division.

It is proposed to revoke the Killeen, Tex. (Robert Gray AAF), and Killeen, Tex. (Fort Hood AAF), control zones. A single control zone, i.e., Killeen, Tex., will be designated which will accommodate IFR arrival/departure procedures serving Fort Hood AAF, Robert Gray AAF, and Killeen Municipal Airport. The Killeen, Tex., control zone is proposed as follows:

KILLEEN, TEX.

Within a 5-mile radius of Fort Hood AAF (lat. 31°08'15" N., long. 97°42'50" W.); within a 4-mile radius of Killeen Municipal Airport (lat. 31°05'10" N., long. 97°41'05" W.); within 3 miles each side of the Hood VOR 219° radial extending from the 4-mile-radius zone to 8 miles southwest of the VOR; within a 5-mile radius of Robert Gray AAF (lat. 31°04'20" N., long. 97°49'45" W.); within 3.5 miles each side of the 341° bearing from the Gray RBN (lat. 31°07'18" N., long. 97°51'02" W.) extending from the 5-mile-radius zone to 11 miles north of the RBN, excluding that portion within R-6302A.

It is proposed to alter the Killeen, Tex., transition area as follows:

KILLEEN, TEX.

That airspace extending upward from 700 feet above the surface within a 6-mile radius of Hood AAF (lat. 31°08'15" N., long. 97°42'50" W.); within a 7-mile radius of Robert Gray AAF (lat. 31°04'20" N., long. 97°49'45" W.); within 9.5 miles west and 5 miles east of the Hood VOR 352° and 172° radials extending from 2 miles north of the VOR to 12 miles south of the VOR; within 5 miles southeast and 9.5 miles northwest of the Hood VOR 219° T (210° M) radial extending from the VOR to 19 miles southwest of the VOR; within 3.5 miles of each side of the 341° bearing from Gray RBN (lat. 31°07'18" N., long. 97°51'02" W.) extending from the 5-mile-radius area to 11.5 miles north of the RBN, excluding that portion within R-6302A.

At present, the Fort Hood AAF control zone is effective full time, while the Robert Gray AAF control zone is effective part time; i.e., 0600-2200 Monday through Friday and 0800-1200 on Saturday. The proposed single Killeen, Tex., control zone will be effective full time based on weather observations conducted at Robert Gray AAF.

Appropriate citations for amendment to Part 71 of the Federal Aviation Regulations and changes in the Killeen, Tex., control zones and transition area are § 71.171 (36 F.R. 2055) and § 71.181 (36 F.R. 2140), respectively.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Fort Worth, Tex., on January 26, 1971.

Hazardous Materials Regulations Board

[49 CFR Parts 172, 173, 176, 178, 179]

[Docket No. HM-77; Notice No. 71-4]

TRANSPORTATION OF HAZARDOUS MATERIALS

Methylacetylene-Propadiene, Stabilized

The Hazardous Materials Regulations Board is considering amending the Department's Hazardous Materials Regula-

tions to provide specific requirements for the shipment of stabilized methylacetylene-propadiene, a flammable compressed gas, in cylinders, tank cars, and tank motor vehicles in accordance with a petition for rule making submitted to the Board. Current provisions for shipping methylacetylene, 15 percent to 20 percent propadiene mixture, in cylinders and tank cars would be deleted. Petitioner has advised that the gas mixture in this specified percentage range is no longer manufactured or shipped. Information submitted also indicates that this currently authorized mixture contains no stabilizing diluents.

The recommended mixture of methylacetylene-propadiene, stabilized, contains not more than 68 percent methylacetylene plus propadiene and at least 32 percent stabilizing diluents consisting of propane, propylene, isobutylene, isobutane, or butadiene. The stability of methylacetylene-propadiene mixtures has been demonstrated by tests, the results of which are on file with the Board. The tests consisted of the blasting cap test, dynamite test, hot spot test, fire test, and vapor ignition test conducted on cylinders containing the gas mixture.

Methylacetylene-propadiene gas is compatible with all LPG cylinders except with cylinders having brazed seams. There is indication that under certain conditions the gas mixture could form acetylides similar to those formed by acetylene. For this reason, no brazed cylinders may be used.

In addition to the changes proposed as set forth below, the petitioner proposed that § 173.315 paragraph (j) be amended to authorize the transportation of stabilized methylacetylene-propadiene in storage tanks built to ASME specifications under the same conditions afforded liquefied petroleum gas. The Board does not believe that the provisions for shipping LPG in non-DOT specification containers should be extended to other gases at this time. The proposal was not supported by sufficient data and, accordingly, will be held in abeyance pending receipt of additional information submitted in conformance with § 170.11.

In consideration of the foregoing, it is proposed to amend 49 CFR Parts 172, 173, 176, 178, and 179 as follows:

I. Part 172.

In § 172.5 paragraph (a) Commodity List would be amended as follows:

CASPER INTRASTATE AIR QUALITY CONTROL REGION

Proposed Designation of Regions; Consultation With Appropriate State and Local Authorities

Notice is hereby given of a proposal to designate an Intrastate Air Quality Control Region in the State of Wyoming as set forth in the following new § 481.213 which would be added to Part 481 of Title 42, Code of Federal Regulations. It is proposed to make such designation effective upon republication.

Interested persons may submit written data, views, or arguments in triplicate to the Office of the Acting Commissioner, Air Pollution Control Office, Room 17-82, 5600 Fishers Lane, Rockville, MD 20852. All relevant material received not later than 30 days after the publication of this notice will be considered.

Interested authorities of the State of Wyoming and appropriate local authorities, both within and without the proposed region, who are affected by or interested in the proposed designation, are hereby given notice of an opportunity to consult with representatives of the Administrator concerning such designation. Such consultation will take place at 1 p.m., on February 17, 1971, in the Council Chamber, City-County Building, North Senter Street, Casper, WY.

Mr. Earl V. Porter is hereby designated as Chairman for the consultation. The Chairman shall fix the time, date, and place of later sessions and may convene, reconvene, recess, and adjourn the sessions as he deems appropriate to expedite the proceedings.

State and local authorities wishing to participate in the consultation should notify the Chairman, Mr. Earl V. Porter, Air Pollution Control Office, Environmental Protection Agency, Federal Office Building, Room 9017, Denver, CO 80202.

In Part 481 the following new section is proposed to be added to read as follows:

§ 481.213 Casper Intrastate Air Quality Control Region.

The Casper Intrastate Air Quality Control Region (Wyoming) consists of the territorial area encompassed by the boundaries of the following jurisdictions or described area (including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited):

In the State of Wyoming:
Converse County. Natrona County.
Fremont County.

This action is proposed under the authority of (section 301(a), 81 Stat. 504; 42 U.S.C. 1857g(a) as amended by section 15(c) (2) of Public Law 91-604).

AVAILABILITY OF LAND MOBILE CHANNELS IN 10 LARGEST URBANIZED AREAS IN U.S.

Notice of Further Proposed Rule Making

1. Notice is hereby given of further proposed rule making in the above captioned matter.

2. This proceeding was initiated by our notice of proposed rule making of August 1, 1968,¹ in which we considered means for providing additional spectrum space to meet the needs of the land mobile radio services in major population centers. In our First Report and Order,² we adopted rules³ which provide for use of a maximum of two of the lower seven UHF channels, on a shared basis with television broadcasting, by land mobile stations within 50 miles of the center of the 10 largest urbanized areas.⁴ Technical standards for this purpose were also adopted and are fully described in the Report and Order.⁵ We left for further study and later decision the basic assignment principles and the specific frequencies in the 470-512 MHz band to be designated for the use of each of the several land mobile services.⁶ This notice looks to a decision on these matters and adoption of appropriate rules to implement the decision. In developing our proposals, consideration has been given to the substantial amount of information submitted, not only in this proceeding, but also in many documented studies and reports concerning land mobile requirements which have been made available to

¹ Land Mobile Use of TV Channels 14 through 20 (Docket No. 18261), 14 FCC 2d 297 (1968).

² Land Mobile Use of TV Channels 14 through 20 (Docket No. 18261), 23 FCC 2d 325 (1970).

³ See Appendices C, D, E, and F of First Report and Order, cited footnote 2, supra, where the major technical rules are set out. As we pointed out at paragraph 67 of the First Report and Order, specific rule provisions covering these matters will be incorporated into Parts 21, 89, 91, and 93 of the Commission's rules at an appropriate date, later.

⁴ The Urbanized Areas and Channels are: New York—northeastern New Jersey, Channels 14 and 15; Los Angeles, Channels 14 and 20; Chicago—northwestern Indiana, Channels 14 and 15; Philadelphia, Pa.—New Jersey, Channels 19 and 20; Detroit, Mich., Channels 15 and 16; San Francisco—Oakland, Calif., Channels 16 and 17; Boston, Mass., Channels 14 and 16; Washington, D.C.—Maryland—Virginia, Channels 17 and 18; Pittsburgh, Pa., Channels 14 and 18; and Cleveland, Ohio, Channels 14 and 15. At the time the specific channel availability for the Chicago and Philadelphia areas was not given, because separate proceedings had been initiated to clear the needed channels for use there. These proceedings have now been completed except for minor administrative matters, and we are in a position to give, as we have, above, the allocations for these two regions. However, the necessary coordination with Canada and Mexico for the use of allocations in Detroit, Cleveland, and Los Angeles, although initiated, has not been completed; but, as we said in the First Report and Order, we believe we will be able to work out mutually satisfactory arrangements for this purpose and we do not see this as a reason for delaying our notice relative to the suballocations. See First Report and Order, supra, at paragraph 64, page 349.

⁵ See particularly, paragraphs 32 through 52 of the First Report and Order, supra, footnote 2, in which we outline in detail the technical aspects of the allocation plan we adopted.

⁶ First Report and Order, supra, footnote 2, at paragraph 67.

the Commission during the past several years.⁷

3. Specifically, we are concerned with the suballocation of the spectrum space made available in the 470-512 MHz band for use by the various classes of land mobile users; the method of allocating the available channels for use in the several land mobile services; and the specific standards under which the frequencies are to be assigned and used. Generally, we propose to employ the same technical standards and method of frequency assignment as are currently applied to land mobile operations in the 450-470 MHz band. This is because essentially the same type of equipment as is now used in the latter range is also capable of being employed in the 470-512 MHz band. Thus, in the First Report and Order, we adopted the same standards for frequency deviation (± 5 kHz), bandwidth (20 kHz), and frequency tolerance (0.0025 percent for nonmobile stations and 0.0005 percent for mobile stations) as we had prescribed for the 450-470 MHz band. We also propose to adopt the remaining relevant technical standards prescribed for land mobile operations in the 450-470 MHz band, namely, 25 kHz channeling and the roll-off filter requirements. The first assignable frequency is to be 12.5 kHz from the lower band edge (that is, for example, 470.0125 MHz for Channel 14), and the last assignable frequency, in each of the available 6 MHz television channels, 12.5 kHz from the upper edge (475.9875 MHz in our example). This is reflected in the attached appendix.

4. With respect to system configuration, i.e., single frequency and two frequency half or full duplex modes of use, we plan to follow the same practice established for use of assignments in the 450-470 MHz band. This means that we will permit two frequency base-mobile use and will specify separate frequencies for base and mobile stations. However, unlike the practice followed in the lower band, we do not intend to permit mobile operation on base station frequencies, i.e., base station assignments may be used only for base station operation. This will facilitate the closer base-to-base station geographical separation we are proposing.

5. Finally, as to these technical aspects of our notice, we have the question as to the appropriate frequency separation between base and mobile frequencies. In the proceeding in Docket No. 13847, which dealt with the 450-470 MHz band,

we considered this matter and adopted requirements for uniform 5 MHz separation between base and mobile channels.⁸ We have the same question here, that is, the most appropriate separation between base and mobile frequencies. We could not adopt 5 MHz spacing, because sufficient contiguous space was not available. We also considered the possibility of using 6 or 12 MHz spacing, but this was not feasible, for essentially the same reason. To illustrate this, while adjacent channels are allocated in seven of the ten urbanized areas, involved, this is not so in the remaining three areas. Finally, we took into account the desirability of having equipment available which can be utilized in all 10 regions. If uniform spacing were not adopted, it would not be possible to standardize the equipment and this, we think, would result in increased cost to the land mobile users. In these circumstances, then, it appears the most feasible base-mobile separation would be 3 MHz. Accordingly, while a wider frequency separation in base and mobile operation might be desirable, we do not think it practical. Moreover, we believe the "state of the art" permits the use of the 3 MHz standard, and we propose to adopt it.

6. We now turn to the allocation problem. Traditionally, frequencies have been allocated, for the most part, to specific radio services in "blocks". In the rule making proceeding in Docket No. 13847 we made substantial departures from this practice and made a portion of the 450-470 MHz band available to a number of services on a "shared" or "pooled" basis in the Industrial, Land Transportation, and Public Safety Radio Services.⁹ We believe it is desirable to proceed further along these lines, and propose to do so.

7. The basic purpose in this proceeding was to provide additional spectrum space to accommodate the immediate and most urgent requirements for additional land mobile channels in our largest urban centers. In general, however, the requirements of the several classes of land mobile users vary from one urban area to another, and with "pooling," we can achieve a better degree of flexibility to meet these variations in needs in the separate geographic areas. With the added flexibility, systems planning is simplified and more efficient use of the assigned frequencies may be expected.

8. Consistent with these objectives, we propose eight basic groups with each sharing a separate frequency pool. These groups, as will be shown below, have common attributes which we feel will permit sharing of the "pooled" frequencies without undue conflict. The following table reflects the sharing groups and the apportionment of channels among them based on a single 6 MHz TV channel (120 two-frequency pairs). For two television channels, the frequency number shown is to be multiplied by two. Each of the groups listed, below, is to be allocated

the number of frequency pairs shown in each of the two allocated 6 MHz television channels.

Group designation	Frequency (pairs assigned)	Eligibility (services)

¹ Eligibles in the State Guard Radio Service will have frequencies available to the extent they are engaged in "local government" functions, as the latter entities will have access to the Public Safety Pool. Eligibles in the Special Emergency Service will, to a large extent, have access to the Business Pool or to the Public Safety Pool, depending upon whether they are governmental functions or are engaged in activities bringing them within the Business Radio Service.

² No specific provision is made for the Motion Picture and Relay Press Radio Services. However, as commercial enterprises, users in those services can employ Business Pool frequencies.

³ Reserve Pools "A" and "B" are unallocated frequencies in different parts of each 6 MHz channel, and are to be used at a later date to meet the needs for additional frequencies in the various services, excluding the Domestic Public Radio Services, as those needs become known.

9. The service pools we propose reflect what we believe is a logical grouping in accordance with the priorities traditionally recognized among the various services and take into account function and user compatibility. To illustrate this, we have included in the Public Safety Pool the Police, Fire, and Local Government Radio Services, and others, where eligibility and use are geared to activities which all involve, primarily, the promotion of the safety of life and property of the general public. Also, the principal users will be governmental entities. Consequently, there will be, to a large degree, compatibility in the class of person licensed in this pool, as well as in the purposes for which the facilities will be employed. Further, with these elements present, we anticipate that the arrangement will afford the flexibility required to permit the establishment of "local" priorities in the facilities requested and, additionally, allow design of systems which will be capable of serving, on a composite basis, the multiple needs of the several arms of local government.

10. As an added indication of the underlying considerations that went into the grouping, we have provided separate assignments (4 frequency pairs) for the Taxicab Radio Service. This was thought desirable, because of the manner in

⁷ See, for example, Report of the Advisory Committee for the Land Mobile Services, Nov. 30, 1967; Report of the President's Commission on Law Enforcement and Administration of Justice: The Challenge of Crime in a Free Society; The Report of the Stanford Research Institute: A Study of Land Mobile Spectrum Utilization (1969); Report of Subcommittee 5 of the Select Committee on Small Business, The Allocation of Radio Frequencies and Its Effect on Small Business, House Report 1978, 90th Cong., second session; and Memorandum of Land Mobile Communications Council, Suballocation of 470-512 MHz band, Informal Recommendations (Sept. 14, 1970).

which taxicab companies use radio—high density, dispatch operations, not predominant in other Part 93 Services. The separate Business Pool is to accommodate the many and diverse users eligible in the Business Radio Service and to permit continuation of the policy of "intensive sharing" which has been followed traditionally in that Service. By contrast, higher priorities have been accorded eligibles in other Industrial Services, such as the Power, Petroleum, and Manufacturers Radio Services, and others, and therefore, separate pools have been created in recognition of their respective communications requirements. The groups also reflect our undertaking to preserve existing eligibility standards, because we did not think it practical or desirable, for present purposes, to redefine them. Further, it was considered important to retain, insofar as it was possible to do so, existing coordination machinery. This will be needed at this time to permit licensing in this band to be conducted in an orderly fashion and as a means of implementing the loading standards we propose to adopt.

11. The number of frequencies assigned to the respective pools reflect our understanding of the relative needs of the several designated user groups, and, as we have indicated, the priorities traditionally accorded the various classes of users and parallel the suggestions made by the land mobile industry. Thus, we have assigned the Public Safety Pool the greatest number of frequency pairs in order to make available to local governmental authorities reasonably adequate frequency resources upon which to establish or improve vital public safety communications systems. The remaining divisions are based on what we believe is a correct apportionment of the available frequencies in accordance with our views as to the potential demand and needs, and the mentioned priorities, as they relate to the communications requirements of the several land mobile radio services. Nevertheless, as can be observed from the allocation table, above, we have provided two separate "reserve" pools to give added assurance that, with experience, we will be in a position to make adjustments so that the demonstrated needs of user groups in the private services can be met.

12. Finally, on the point of coordination of the use of these frequencies, it seems to us desirable to have a somewhat different system than is currently employed in the several land mobile services, and we propose that it be carried out by a single coordinating entity designated for each group in each of the 10 areas involved. This will not be difficult in some of the service pools. For example, existing committees could coordinate for the Special Industrial, Business and Taxicab groups. But some rearrangement may be required as to a number of the other Industrial and Land Transportation Services, and in the Public Safety Services, as well, for, although there are existing coordination procedures, with persons appointed or assigned to carry them out, this is done by

separate committees which are independent from one another and whose organization does not fit the new groups we plan to establish. Additionally, applicants should be given the alternative of demonstrating that the frequency pair applied for is available for assignment in accordance with the loading standards proposed in this notice, similar to the alternative method of coordination now prescribed in the rules. Accordingly, we ask the parties to address themselves to this proposition and to give us their views as to the manner in which they feel coordination in each area could best be carried out and as to how coordinating committees should be organized.

13. In addition to these matters, we propose to adopt some reasonable loading standards for the shared use of the pool frequencies. For this purpose, the following plan is proposed:

Public Safety Pool.....	50 units.
Business and Taxicab Pool.....	90 units.
All other, except Domestic Public	

Radio Service Pool¹⁰..... 70 units.
We would define the term "unit" as "one vehicular mobile unit" or four "hand-carried transmitter-receivers." Thus, in the Public Safety Pool, channel capacity would be reached where a licensee has in use 50 vehicular mobile units, or 200 hand-carried devices, or, for example, 20 radio patrol cars and 120 hand units. We recognize, of course, that channel loading solely in terms of transmitter density is not as reliable a standard as others, such as, actual channel use. However, until a different management system is established and the tools for measuring and using channel occupancy information are available, or for that matter, other loading standards are developed and implemented, we are constrained to use "number of transmitters," to determine when a channel is being employed at its full potential.

14. In accordance with these loading standards, then, a licensee will be required to show that an assigned frequency pair is at full capacity before that licensee will be given a second pair. The loading standards will be applied, not in terms of the number of mobile units authorized, rather in terms of the number of units actually in use or to be placed in use within eight months following authorization. Also, as part of our frequency loading criteria, we propose to permit re-use of each frequency pair at distances of 40 miles or more from the point of original authorization. For example, if a user has 20 vehicles equipped with radio, it will be assigned one frequency pair, only. If it has 100 such units in use and is eligible in the Business Pool, it would be entitled to two pairs, but it would not be mobile pair. With respect to the 40-mile we assume that licensees will operate as many mobile units as possible on an assigned pair of frequencies. Moreover,

¹⁰ The loading standards are not to apply to the use of frequencies in the Domestic Public Radio Service Pool. As indicated, at paragraph 16, infra, this is not necessary, due to the nature of the licensing processes in these common carrier services.

channel capacity may be reached either by the requirements of a single licensee or by several users sharing a given frequency. To illustrate, licensee "A" has 50 mobile units; "B", 20 units; and "C", 20 units. Then, in the Business Pool, "A", "B", or "C", could ask for a second base-mobile pair, assuming they have added units to place in operation and, of course, also assuming "A", "B", and "C" were all sharing a single base-mobile pair. With respect to the 40-mile separation standard, if a given frequency pair (for example, in the Boston Urbanized Area) is in use, then that same pair may be requested and used by the same or a different applicant-licensee in the Boston area without reference to its occupancy, where the transmitter site of the second station is 40 miles or more from the site of any other land mobile base station facility on that frequency.

15. Thus far, our proposal is designed to accommodate the usual base-mobile type of land mobile voice communications, and, the foregoing loading standards are based on concepts compatible with that mode of operation. The parties may feel there is a need for designating some of the available frequencies for paging purposes, on an exclusive basis. Recent indications are that paging frequencies are being used extensively, and that there may be a need for added paging capacity in some of the services. Further, industry members have suggested that consideration be given to possible authorization of "tone signalling" in this band, particularly on those frequencies assigned for use by persons who have important needs for this mode of operation. Also, in comments filed earlier in this proceeding, and in the petition for rule making, filed on November 19, 1970, by the county of Los Angeles (RM-1712), requests have been made for the provision of frequencies in the 470-512 MHz band for use in the transmission of data on the condition of cardiac patients en route to hospitals in emergency vehicles. This, of course, involves, in part, non-voice emissions, too. We feel we should take this opportunity to permit the parties to address themselves to these three subjects, insofar as the use of the 470-512 MHz band is involved; and accordingly, we ask for comments on these aspects of the use of the frequencies available in this band. We request that the comments cover the points as to whether specific frequencies should be made available for these purposes, and, if so, in which service groups and under what special conditions.

16. As we have indicated, we are not proposing loading criteria for the channels to be allocated in the Domestic Public Land Mobile Radio Service because it is not necessary. In this service, we plan to follow the pertinent rules and procedures currently used in authorizing common carrier land mobile radio systems. It is our intent to limit the use of the frequencies to those licensees currently authorized to serve the areas involved. Also, we wish to point out that,

although the protection standards we adopted in the First Report and Order permit as much as 1,000 watts effective radiated power at 500 feet above average terrain, the present limitations in Part 21 of our rules, which impose greater maximum restrictions with respect to power and antenna height, will apply. Finally, as between common carrier stations, the current standards in Part 21 applicable to the 450-460 MHz frequency band for determining field strength contours describing the limits of reliable service areas of base stations and for determining areas of harmful interference between common carrier co-channel base stations will apply.

17. The foregoing proposals are issued pursuant to authority contained in sec-

tions 4(i) and 303(r) of the Communications Act, as amended.

18. Pursuant to procedures set out in § 1.415 of the Commission's rules, interested parties may file comments on or before March 9, 1971, and reply comments on or before March 19, 1971. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this notice.

19. In accordance with the provisions of § 1.419 of the Commission's rules, an original and 14 copies of all statements,

briefs, or comments shall be furnished the Commission.

Adopted: January 27, 1971.

Released: January 28, 1971.

¹ The first and last assignable frequencies are shown within the various frequency pools. Assignable frequencies occur in increments of 25 kHz. The separation between base and mobile transmit frequencies is 3 MHz.

² Frequency coordination is required for all applications for a new frequency or for changes in existing facilities to increase effective radiated power, increase antenna height, relocate a base station or add new base or mobile facilities.

³ Frequencies are available for assignment in the Local Government, Police, Fire, Highway Maintenance, and Forestry-conservation Radio Services.

⁴ Reserved Pools "A" and "B" are to be used at a later date to meet the needs for additional frequencies in the various private services.

⁵ Frequencies are available for assignment in the Power and Telephone Maintenance Radio Services.

⁶ Frequencies are available for assignment in the Special Industrial Radio Service.

⁷ Frequencies are available for assignment in the Business Radio Service.

⁸ Frequencies are available for assignment in the Taxicab Radio Service.

⁹ Frequencies are available for assignment in the Railroad, Motor Carrier and Automobile Emergency Radio Services.

¹⁰ Frequencies are available for assignment in the Petroleum, Manufacturers, and Forest Products Radio Services.

¹¹ The channel loading standard is 50 units. A unit is defined as one vehicular mobile unit or four hand carried transmitter receivers. Loading standards will be applied in terms of the number of units actually in use or to be placed in use within 8 months following authorization. A licensee will be required to show that an assigned frequency pair is at full capacity before it may be assigned a second or additional frequency.

Channel capacity may be reached either by the requirements of a single licensee or by several users sharing a channel. Until a channel is loaded to capacity it will be available for assignment to other users in the same area. A frequency pair may be reassigned at distances 40 miles or more from the location of base station authorized on that pair without reference to loading at the point of original installation.

¹² The channel loading standard is 70 units. A unit is defined as one vehicular mobile unit or four hand carried transmitter receivers. Loading standards will be applied in terms of the number of units actually in use or to be placed in use within 8 months following authorization. A licensee will be required to show that an assigned frequency pair is at full capacity before it may be assigned a second or additional frequency. Channel capacity may be reached either by the requirements of a single licensee or by several users sharing a channel. Until a channel is loaded to capacity it will be available for assignment to other users in the same area. A frequency pair may be reassigned at distances 40 miles or more from the location of base station authorized on that pair without reference to loading at the point of original installation.

¹³ The channel loading standard is 90 units. A unit is defined as one vehicular mobile unit or four hand carried transmitter receivers. Loading standards will be applied in terms of the number of units actually in use or to be placed in use within 8 months following authorization. A licensee will be required to show that an assigned frequency pair is at full capacity before it may be assigned a second or additional frequency. [Reg. T]

CREDIT BY BROKERS AND DEALERS

Limitations on Exempt Credit to Specialists

Pursuant to the authority contained in the Securities Exchange Act of 1934 (15 U.S.C. 78g), the Board of Governors proposes to amend Part 220 in the following respects:

Section 220.4 would be amended by revising paragraph (g) to read as follows:

§ 220.4 Special accounts.

(g) *Specialist's account.* (1) In a special account designated as a specialist's account, a creditor may effect and finance, for any member of a national securities exchange who is registered and acts as a specialist in securities on the exchange, such member's transactions as a specialist in such securities, or effect and finance, for any joint venture in which the creditor participates, any transactions in any securities of an issue with respect to which all participants, or all participants other than the creditor, are registered and act on a national securities exchange as specialists.

(2) Such specialist's account shall be subject to the same conditions to which it would be subject if it were a general account except that if the specialist's exchange, in addition to the other requirements applicable to specialists, is designated by the Board of Governors of the Federal Reserve System as requiring reports suitable for supplying current information regarding specialists' use of credit pursuant to this paragraph (g), the requirements of § 220.6(b) regarding joint ventures shall not apply to such accounts and the maximum loan value of a registered security in such account (except a security that has been identified as a security held for investment pursuant to a rule of the Commissioner of Internal Revenue (Regs. section 1-1236-1(d))) shall be as determined by the creditor in good faith: *Provided*, That in the case of credit extended on any block of stock or portion thereof with a current market value of \$200,000 or more, acquired from a single source at approximately the same time, whether in a single transaction or in several transactions, the requirements of subparagraph (3) of this paragraph (g) shall also apply.

(3) (i) In the case of credit extended on any block of stock or portion thereof described in subparagraph (2) of this paragraph (g), the creditor shall identify the credit extended pursuant to this paragraph (g) and all the collateral used to support such credit. (ii) No credit shall be extended pursuant to this paragraph (g) in respect of any such block of stock or portion thereof which the specialist has held continuously for more than 15 business days, and any credit extended pursuant to this paragraph (g) shall be extinguished before the expiration

of such 15-day period. (iii) In exceptional cases such 15-day period may on application of the specialist and the creditor be extended for one or more periods limited to 5 business days each commensurate with the circumstances by any regularly constituted committee of a national securities exchange which has jurisdiction over the business conduct of its members, of which the specialist is a member: *Provided*, That such committee is satisfied that the specialist and the creditor are acting in good faith in making the application and that the circumstances in fact warrant such treatment. (iv) For the purposes of this subparagraph (3), a block of stock or portion thereof shall be treated as not having been held continuously only to the extent that there has been a net sale (or in the case of short positions, net purchase) of such securities (whether or not represented by the same certificate) during such 15-day period and/or such extension.

The proposed change in § 220.4(g) would restrict the ability of specialists to obtain exempted credit from other broker/dealers without regard to the limitations of Part 220 (Regulation T) in connection with substantial blocks of stock positioned in the course of their specialist activity. Such credit would be available for a limited period of time only, and would be in conformity with restrictions similar to those that would be imposed under Part 221 (Regulation U) on credit by banks to finance block positioning by specialists, Third market makers, OTC market makers, and block-positioners. Such period could be extended in exceptional circumstances for one or more additional limited periods, by a committee of the exchange of which the specialist was a member. The change would also clarify that securities held for investment are not eligible for exempt credit under § 220.4(g). The provisions for bank credit to finance specialists and OTC market makers are contained in Part 221 (Regulation U) in § 221.3(o) and § 221.3(w) respectively and proposed amendments to these sections are being published simultaneously with this proposal.

This notice is published pursuant to section 553(b) of title 5, United States Code, and § 262.2(a) of the rules of procedure of the Board of Governors of the Federal Reserve System (12 CFR 262.2(a)).

To aid in the consideration of these matters by the Board, interested persons are invited to submit relevant data, views, or arguments. Any such material should be submitted in writing to the Secretary, the Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than March 17, 1971. Such material will be made available for inspection and copying upon request, except as provided in § 261.6(a) of the Board's Rules Regarding Availability of Information.

By order of the Board of Governors,
January 26, 1971.

Deputy Secretary.

CREDIT BY BANKS FOR THE PURPOSE OF PURCHASING OR CARRYING MARGIN STOCKS

Limitations on Exempt Credit to Specialists and OTC Market Makers; Proposal for Exempt Credit to Third-Market Makers and Block-Positioners

Pursuant to the authority contained in the Securities Exchange Act of 1934 (15 U.S.C. 78g), the Board of Governors proposes to amend Part 221 in the following respects:

Section 221.3 would be amended by revising paragraph (o) and subparagraph (1) of paragraph (w) and by adding paragraph (y) and paragraph (z), as set forth below:

§ 221.3 Miscellaneous provisions.

(o) *Specialist.* In the case of credit extended to a member of a national securities exchange who is registered and acts as a specialist in securities on the exchange for the purpose of financing such member's transactions as a specialist in such securities, the maximum loan value of any stock (except stock that has been identified as a security held for investment pursuant to a rule of the Commissioner of Internal Revenue (Regs. section 1-1236-1(d))) and except a block of stock or portion thereof with a current market value of \$200,000 or more, acquired from a single source at approximately the same time, whether in a single transaction or in several transactions) shall be as determined by the bank in good faith: *Provided*, That the specialist's exchange, in addition to other requirements applicable to specialists, is designated by the Board of Governors of the Federal Reserve System as requiring reports suitable for supplying current information regarding specialists' use of credit pursuant to this section.

(w) *OTC market maker exemption.* (1) In the case of credit extended to an OTC market maker, as defined in subparagraph (2) of this paragraph (w), for the purpose of purchasing or carrying an OTC margin stock in order to conduct the market-making activity of such a market maker, the maximum loan value of any OTC margin stock (except stock that has been identified as a security held for investment pursuant to a rule of the Commissioner of Internal Revenue (Regs. section 1-1236-1(d))) and except a block of stock or portion thereof with a current market value of \$200,000 or more, acquired from a single source at approximately the same time, whether in a single transaction or in several transactions) shall be determined by the bank in good faith: *Provided*, That in respect of each such stock the OTC market maker shall have filed with the Securities and Exchange Commission a notice of his intent to begin or continue such market-making activity (Securities and Exchange Commission Form X-17A-12

(a) and all other reports required to be filed by market makers in OTC margin stocks pursuant to a rule of the Commission (Rule 17a-12 (17 CFR 240.17a-12)) and shall not have ceased to engage in such market-making activity; *And provided further*, That the bank shall obtain and retain in its records for at least 3 years after such credit is extinguished a statement in conformity with the requirements of Federal Reserve Form U-2, executed by the OTC market maker who is the recipient of such credit and executed and accepted in good faith¹ by a duly authorized officer of the bank prior to such extension. In determining whether or not an extension of credit is for the purpose of conducting such market-making activity, a bank may rely on such a statement if executed and accepted in accordance with the requirements of this paragraph (w) and paragraph (a) of this section.

(y) Third-market maker exemption.

(1) in the case of credit extended to a Third-market maker, as defined in subparagraph (2) of this paragraph (y), for the purpose of purchasing or carrying a stock that is registered on a national securities exchange (other than a convertible security described in paragraph (t) (1) of this section) in order to conduct the market-making activity of such a market maker, the maximum loan value of any stock (except (i) a convertible security described in paragraph (t) (1) of this section, (ii) stock that has been identified as a security held for investment pursuant to a rule of the Commissioner of the Internal Revenue (Regs. section 1-1236-1(d)) and (iii) a block of stock or portion thereof with a current market value of \$200,000 or more, acquired from a single source at approximately the same time, whether in a single transaction or in several transactions), shall be determined by the bank in good faith: *Provided*, That in respect of each such stock he shall, at least 10 full business days prior to such extension of credit, have filed with the Securities and Exchange Commission a notice of his intent to begin or continue such market-making activity, and all other reports required to be filed by Third-market makers pursuant to a rule of the Securities and Exchange Commission and, except when such activity is unlawful, shall not have ceased to engage in such market-making activity; *And provided further*, That the bank shall obtain and retain in its records for at least 3 years after such credit is extinguished a statement in conformity with the requirements of Federal Reserve Form U-3, executed by the Third-market maker who is the recipient of such credit and executed and accepted in good faith¹ by a duly authorized officer of the bank prior to such extension. In determining whether or not an extension of credit is for the purpose of conducting such market-making activity, a bank may rely on such a statement, if executed

and accepted in accordance with the requirements of this paragraph (y) and paragraph (a) of this section.

(2) A Third-market maker with respect to a stock that is registered on a national securities exchange is a dealer who has and maintains net capital, as defined in a rule of the Securities and Exchange Commission (Rule 15c3-1 (17 CFR 240.15c3-1)), of \$250,000 for each such stock in respect of which he has filed and not withdrawn a notice with the Securities and Exchange Commission (but in no case does this subparagraph (2) require net capital of more than \$1 million) who is in compliance with such rule of the Commission and who, except when such activity is unlawful, meets all the following conditions with respect to such stock: (i) He furnishes bona fide, competitive bid and offer quotations at all times to other broker/dealers on request, (ii) he is ready, willing, and able to effect transactions for his own account in reasonable amounts, and at his quoted prices, with other brokers and dealers, (iii) he does not more than 25 percent of his business in the stock with other market makers and national securities exchanges and (iv) he has a reasonable average rate of inventory turnover on the stock.

(3) If all or a portion of the credit extended pursuant to this paragraph (y) ceases to be for the purpose specified in subparagraph (1) of this paragraph or the dealer to whom the credit is extended ceases to be a Third-market maker as defined in subparagraph (2) of this paragraph, the credit or such portion thereof shall thereupon be treated as "a credit subject to § 221.1".

(z) Block positioner exemption. (1) In the case of credit extended to a block positioner, as defined in subparagraph (2) of this paragraph (z), for the purpose of financing the activity of block positioning, the maximum loan value of any stock obtained in the ordinary course of the activity of block-positioning as described in subparagraph (2) of this paragraph (z) (except (i) a convertible security described in paragraph (t) (1) of this section and (ii) stock that has been identified as a security held for investment pursuant to a rule of the Commissioner of Internal Revenue (Regs. section 1-1236-1(d))) shall be determined by the bank in good faith: *Provided*, That in respect of such activity he shall have filed with the Securities and Exchange Commission a notice of undertaking such activity on a form prescribed by the Commission, and all other reports required to be filed by block-positioners; *And provided further*, That the bank shall obtain and retain in its records for at least 3 years after such credit is extinguished a statement in conformity with the requirements of Federal Reserve Form U-5 and paragraph (a) of this section, executed by the block positioner who is the recipient of such credit and executed and accepted in good faith¹ by a duly authorized officer of the bank prior to such extension. In determining whether or not an

extension of credit is for the purpose of conducting such block positioning activity, a bank may rely on such a statement if executed and accepted in accordance with the requirements of this paragraph (z) and paragraph (a) of this section. In determining whether or not an extension of time has been granted pursuant to subparagraph (3) of this paragraph (z) and whether or not such extension of time is commensurate with the circumstances the bank may rely on a statement executed by an officer of the exchange or association on behalf of the committee in conformity with the requirements of Federal Reserve Form U-6 and paragraph (a) of this section.

(2) A block positioner is a dealer who (i) is registered with the Securities and Exchange Commission under section 15 of the Securities Exchange Act of 1934 (15 U.S.C. 78o) and has a minimum net capital, as defined in a rule of the Securities and Exchange Commission (Rule 15c3-1 (17 CFR 240.15c3-1)) or in the capital rules of an exchange of which he is a member if the members thereof are exempt therefrom by Rule 15c3-1(b) (2) of the Commission (17 CFR 240.15c3-1 (b) (2)), of \$250,000, or who is a registered specialist on a national securities exchange, (ii) engages in the activity of purchasing long or selling short as principal, from time to time, from or to a customer (other than a partner or a joint venture or other entity in which as partner of the dealer, or the dealer itself, participates or a person "associated with" such dealer as defined in section 3(a)(18) of the Securities Exchange Act of 1934) a block of stock (other than a convertible security as described in paragraph (t) (1) of this section) with a current market value of \$200,000 or more, in a single transaction to facilitate a sale or purchase by such customer, (iii) certifies to the lending bank that he has determined in the exercise of reasonable diligence that the block could not be sold to or purchased from others on equivalent or better terms, and (iv) sells the shares comprising such block as rapidly as possible commensurate with the circumstances.

(3) No credit shall be extended or maintained pursuant to this paragraph (z) in respect of any such block of stock or portion thereof which the block-positioner has held continuously for more than 15 business days, and any credit extended pursuant to this paragraph (z) shall be extinguished or brought into conformity with the initial margin requirements of §§ 221.1 and 221.4 before the expiration of such 15-day period. For the purposes of this subparagraph, a block or portion thereof shall be treated as not having been held continuously only to the extent that there has been a net sale (or in the case of short positions, net purchase) of such securities (whether or not represented by the same certificate) during such 15-day period.

(4) In exceptional cases the 15-day period specified in subparagraph (3) of this paragraph (z) may on the application of the block-positioner, be extended for one or more periods limited to 5 busi-

¹ As described in paragraph (a) of this section.

¹ As described in paragraph (a) of this section.

ness days each commensurate with the circumstances by any regularly constituted committee of a national securities exchange having jurisdiction over the business conduct of its members, of which the block-positioner is a member or through which his transactions are effected, or by a committee of a national securities association: *Provided*, That such committee is satisfied that the block-positioner is acting in good faith in making the application and that the circumstances in fact warrant such treatment.

The proposed change in § 221.3(o) would restrict the ability of specialists to obtain credit from banks without regard to the limitations of Part 221 (Regulation U) in connection with substantial blocks of stock positioned in the course of their specialist activity. Such credit would be available only in conformity with the requirements of proposed § 221.3(z), and not otherwise. This restriction is similar to that which would be imposed under Part 220 (Regulation T) on credit by broker/dealers to finance block-positioning by specialists. The change would also clarify that securities held by specialists for investment are not eligible for exempt credit under § 221.3(o).

The proposed change in § 221.3(w) would restrict the ability of OTC market makers to obtain exempted credit from banks without regard to the limitations of Part 221 (Regulation U) in connection with substantial blocks of stock positioned in the course of their market-making activity. Such credit would be available only in conformity with the requirements of proposed § 221.3(z), and not otherwise.

Section 221.3(x), proposed for comment by the Board of Governors on May 5, 1969 (34 F.R. 7823, May 16, 1969), would be revised as § 221.3(y), and would restrict the ability of Third-market makers to obtain credit from banks without regard to the limitations of Part 221 (Regulation U) in connection with substantial blocks of stock positioned in the course of their market-making activity. Such credit would be available only in conformity with the requirements of proposed § 221.3(z), and not otherwise. The revision would also provide that if the credit ceased to be for the purpose of making such a market, or the customer ceased to be a Third-market maker, the remaining credit would become restricted in accordance with the provisions of §§ 221.1 and 221.4 of this part. A similar provision applies to OTC market makers under § 221.3(w).

The proposed paragraph (z) of § 221.3 would permit certain broker/dealers (including qualifying specialists, Third-market makers, and OTC market makers) to obtain credit from banks without regard to the restrictions of Part 221 (Regulation U) in connection with their activities as block-positioners. However, the credit would have to be brought into conformity with the initial margin requirements imposed by Part 221 if (1) the credit ceased to be for the purpose of carrying on such an activity, or (2) the dealer ceased to be a block-positioner. In any event, credit extended pursuant to paragraph (z) would have to be paid back or brought into conformity with ordinary margin requirements within 15 business days, unless extended in exceptional cases, for one or more additional

periods limited to 5 business days each by appropriate procedures.

For credit to be in connection with block-positioning, the broker/dealer must certify that the credit is used to buy a substantial amount of securities in order to facilitate a securities transaction too large to be handled through normal channels. The credit would enable the broker/dealer to acquire for his own account that part of the transaction that the market could not otherwise absorb; he must thereafter close his position as quickly as circumstances permit. Any credit extended in connection with the transaction thereafter becomes subject to the ordinary initial margin requirements imposed by Part 221.

This notice is published pursuant to section 553(b) of title 5, United States Code, and § 262.2(a) of the rules of procedure of the Board of Governors of the Federal Reserve System (12 CFR 262.2(a)).

To aid in the consideration of these matters by the Board, interested persons are invited to submit relevant data, views, or arguments. Any such material should be submitted in writing to the Secretary, the Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than March 17, 1971. Such material will be made available for inspection and copying upon request, except as provided in § 261.6(a) of the Board's Rules Regarding Availability of Information.

By order of the Board of Governors,
January 26, 1971.

NEW MEXICO

Notice of Proposed Withdrawal and Reservation of Lands

JANUARY 29, 1971.

The Forest Service, U.S. Department of Agriculture, has filed application, Serial No. New Mexico 13101, for the withdrawal of the lands described below. The lands were conveyed to the United States pursuant to section 8 of the Taylor Grazing Act. They lie within the exterior boundary of the Santa Fe National Forest. They have not been open to entry under the public land laws. The applicant desires the lands for the addition to and the consolidation with national forest lands to permit more efficient administration thereof in the conservation of natural resources.

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, Land Office Manager, Post Office Box 1449, Santa Fe, NM 87501.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of adjusting the application to reduce the area to the minimum essential to meet the applicant's needs, to provide for the maximum concurrent utilization of the lands for purposes other than the applicant's, to eliminate land needed for purposes more essential than the applicant's, and to reach agreement on the concurrent management of the lands and their resources.

He will also prepare a report for consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn as requested by the applicant agency.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The lands involved in the application are:

UTAH

Notice of Proposed Withdrawal and Reservation of Lands

JANUARY 28, 1971.

The U.S. Department of Agriculture, Forest Service, has filed application Utah 10287 for the withdrawal of the lands described below from all forms of appropriation except the general mining and mineral leasing laws, subject to existing valid rights, as an addition to the Uinta National Forest.

The Forest Service's proposal represents part of a boundary adjustment program with the Bureau of Land Management.

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with this proposed withdrawal may pre-

sent their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, Post Office Box 11505, Salt Lake City, UT 84111.

The Department's regulations (43 CFR 2351.4(c)) provide that the authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the justification of the withdrawal and will prepare a report for consideration of the Secretary. The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

If circumstances warrant, a public hearing will be held at a convenient time and place, which will be announced.

The lands involved in this application are:

WYOMING

Notice of Proposed Withdrawal and Reservation of Lands

JANUARY 29, 1971.

The Forest Service, U.S. Department of Agriculture, has filed an application, Serial No. Wyoming 27005, for the withdrawal of lands described below, from location and entry under the general mining laws, but not the mineral leasing laws, subject to valid existing rights.

The applicant wishes to assure tenure of the described lands to allow for their development as an administrative site by the Bureau of Land Management.

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, 2120 Capitol Avenue, Cheyenne, WY 82001.

The authorized officer will prepare a report for consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn as requested by the applicant agency.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will

be sent to each interested party of record. If circumstances warrant a public hearing will be held at a convenient time and place, which will be announced.

The land involved in the application is:

SIXTH PRINCIPAL MERIDIAN

T. 30 N., R. 100 W.,
 Sec. 36, lots 9 and 17.

The area described contains 75.90 acres.

JOHN T. WASSERBURGER,
Acting State Director.

CIGAR-FILLER (TYPE 41) TOBACCO

Notice of Referendum

Notice is hereby given that on February 22 to 26, 1971, each inclusive, a referendum will be held of farmers engaged in the production in 1970 of Cigar-filler (type 41) tobacco, pursuant to the provisions of the Agricultural Adjustment Act of 1938, as amended. Notice was given (35 F.R. 18400) that consideration would be given to data, views, and recommendations on establishing the date or period for holding the referendum and whether the referendum would be conducted at polling places rather than by mail ballot. No data, views, or recommendations regarding the referendum were received pursuant to such notice. It is hereby determined that the referendum will be held by mail ballot during the period specified above. The purpose of the referendum is to determine whether the farmers voting favor a national marketing quota for each of the 1971-72, 1972-73, and 1973-74 marketing years for Cigar-filler (type 41) tobacco. The referendum will be conducted in accordance with the provisions of the Act and the Regulations Governing the Holding of Referenda on Marketing Quotas (28 F.R. 13249), Part 717 of this chapter.

Signed at Washington, D.C., on: January 26, 1971.

VIRGINIA SUN-CURED TOBACCO

Notice of Referendum

Notice is hereby given that on February 22 to 26, 1971, each inclusive, a referendum will be held of farmers engaged in the production of 1970 crop Virginia sun-cured tobacco, pursuant to the provisions of the Agricultural Adjustment Act of 1938, as amended. Notice was given (35 F.R. 18400) that consideration would be given to data, views, and recommendations on establishing the date or period for holding the referendum and whether the referendum would be conducted at polling places rather than by mail ballot. No data, views, or recommendations regarding the referendum were received pursuant to such notice. It is hereby determined that the referendum will be held by mail ballot during the period specified above. The purpose of the referendum is to determine whether the farmers voting favor a national marketing quota for each of the 1971-72, 1972-73, and 1973-74 marketing years for Virginia sun-cured tobacco. The referendum will be conducted in accordance with the provisions of the Act and the Regulations Governing the Holding of Referenda on Marketing Quotas, as amended (28 F.R. 13249), Part 717 of this chapter.

Signed at Washington, D.C., on January 28, 1971.

NUMBER OF EMPLOYEES, TAXABLE WAGES, GEOGRAPHIC LOCATION AND KIND OF BUSINESS FOR ESTABLISHMENTS OF MULTIUNIT COMPANIES

Notice of Consideration for Surveys

Notice is hereby given that the Bureau of the Census is considering a proposal under the provisions of title 13, United States Code, sections 181, 224, and 225, to conduct a First Quarter 1971 Survey of Selected Multiunit Companies. This survey is similar to those conducted for previous County Business Patterns Reports. It is designed to collect information for the 1971 Report on the number of employees, taxable wages, geographic location, and kind of business for the establishments of selected multiunit companies. The data will have significant application to the needs of the public and to governmental agencies and are not publicly available from nongovernmental or governmental sources.

The survey, if conducted, shall begin not earlier than 30 days after publication of this notice in the FEDERAL REGISTER.

Copies of the proposed form and a description of the collection methods are available on request to the Director, Bureau of the Census, Washington, D.C. 20233.

Any suggestions or recommendations concerning the subject matter of the proposed survey submitted to the Director in writing within 30 days after the date of this publication will receive consideration.

Dated: January 19, 1971.

[Dockets Nos. 22859, 23053; Order 71-1-137]

WESTERN AIR LINES, INC.

Order of Investigation and Suspension

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 29th day of January 1971.

By tariff revisions¹ filed December 31, 1970, and marked to become effective February 1, 1971, Western Air Lines, Inc. (Western), proposes increases on general commodity rates between Portland and Seattle-Tacoma, on the one hand, and points in Alaska, on the other, and between points in Alaska, as follows: (1) Under 100-pound rates are typically increased by 1 cent per pound; (2) general commodity rates for shipments with minimum weights 100, 220, 440, 1,000, and 2,000 pounds are increased on the following formula, subject to a maximum increase of 10 percent:

Distance	Increase (cwt.)
0-750 miles.....	\$1.50
751-1,500 miles.....	1.25
Over 1,500 miles.....	1.00

Complaints requesting suspension pending investigation of the proposed in-

creases insofar as they apply to the construction of premium rates were filed by the National Retail Pet Supply Association, and the Western Wholesale Pet Supply Association.

These complaints variously assert, inter alia, that the proposed rates (1) would seriously injure shippers of live animals, and (2) are similar to those of American Airlines, Inc. (American), and Braniff Airways, Inc. (Braniff), with respect to premium traffic in that no showing has been made that existing premium rates do not cover costs.

In Orders 70-12-143 and 71-1-63, dated December 28, 1970, and January 13, 1971, respectively the Board determined to permit American and Braniff to place into effect, pending investigation, increases in freight rates of a similar order of magnitude to those in Western's current proposal.² The Board, however, suspended American's and Braniff's proposals to the extent that they would be used in the determination of rates and minimum charges in conjunction with premium ratings, chiefly applicable to live animals.

Consistent with the foregoing orders and in view of other relevant matters, the Board has determined to permit the Western filing to become effective except as the filing applies to the determination of premium rates. Western reported for the 12 months ended June 30, 1970, for domestic all-cargo services, a loss after taxes of \$602,000. For the 12 months ended September 30, 1970, Western reported a net loss after special items of \$5.1 million for its total domestic services. The Board finds, as it did in the noted orders, that the proposed increases applicable to general commodity traffic do not appear unreasonably large and should not adversely affect most shippers to a significant degree. The tariff revisions to and from the Alaska gateways are already under investigation in Docket 22859 Domestic Air Freight Rate Investigation, and the premium rates are under investigation in Docket 21474, In the Matter of Air Freight Rates on Live Animals and Birds.

The complaints contend and the Board notes the anomalies in Western's exception rating schedule wherein the premium for traffic moving between Seattle-Tacoma and Alaska may be greater than, or less than, the premium for traffic moving between points not involving Alaska, depending upon the commodity involved and that Western has not reexamined its exception ratings and refiled those it was prepared to justify, as the Board suggested in Order 69-9-149 in Docket 21474. The Board further notes that except as to traffic between Seattle-Tacoma and Alaska, no exception rating has been established which would remove the application of

² For shipments of 100 pounds and over, those increases amounted to 6 percent for westbound general commodity rates and 10 percent for numerous eastbound and northbound rates. For smaller shipments, the general commodity rate increases were 1 or 2 cents per pound. In addition, American was permitted to raise most specific commodity rates up to a maximum of 10 percent.

general commodity local single-factor rates to traffic originating outside of Alaska and destined to a point within Alaska or originating at a point within Alaska and destined to a point outside Alaska.³

To the extent that the carrier's premium rate structure may not be lawful, the situation is of course aggravated by increases in basic general commodity rates. As previously indicated in Order 70-12-143 of December 28, 1970, and 71-1-63 of January 13, 1971, involving increased rates of American and Braniff, respectively, the Board is not prepared to accept without investigation further tariff increases, insofar as they would effect any increases in premium rates⁴ in the absence of a prima facie showing that such increased premium rates are necessary to cover the costs of transporting such traffic. Western, however, has provided no rationale for its rate increases on premium-rated traffic, nor has it made any showing that existing rates as they apply to such traffic do not cover the costs of transportation nor has it otherwise provided support for increasing premium rates. In these circumstances, the Board will suspend the application of the increased rates on premium traffic.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a) and 1002 thereof,

It is ordered, That:

1. An investigation be instituted to determine whether the rates and charges described in Appendix A hereto,⁵ and rules, regulations, or practices affecting such rates and charges, are, or will be, unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and if found to be unlawful, to determine and prescribe the lawful rates and charges, and rules, regulations, or practices affecting such rates and charges;

2. Pending hearing and decision by the Board, the rates and charges described in Appendix A hereto⁶ are suspended and their use deferred to and including May 1, 1971, unless otherwise ordered by the Board, and that no changes be made therein during the period of suspension

³ The exception ratings to Western's general commodity rates tariff provide in column 1 thereof for premium ratings (a) between Seattle-Tacoma only, on the one hand, and points wholly within Alaska, on the other, and (b) between points wholly within Alaska. Column 2 of Western's exception ratings, for application between other points on Western's system, is specifically marked as not applicable from and to points in Alaska nor between points wholly within Alaska.

⁴ The Board considers that it is desirable for carriers to make appropriate tariff filings to simplify their tariffs where, as here, the suspension of a proposal is applicable only to its use in determining rates on traffic moving under exception ratings and result in a dual system of basic general commodity rates. The Board will consider tariff revisions to the premium percentages stated in the carriers' exception ratings to accomplish this end. Such revisions, however, should fully meet the hold-the-line requirement stated above as to on-line traffic.

⁵ Filed as part of the original document.

except by order or special permission of the Board;

3. The complaint filed by National Retail Pet Supply Association in Docket 23008, and Western Wholesale Pet Supply Association in Docket 23007 will be dismissed except to the extent granted herein; and

4. A copy of this order should be filed with the tariffs and served upon Western Air Lines, Inc., National Retail Pet Supply Association, and Western Wholesale Pet Supply Association, which are hereby made parties to Docket 23053.

This order will be published in the FEDERAL REGISTER.

[Independent Ocean Freight Forwarder
License No. 1151]

DAVIS VAN & STORAGE

Order of Revocation

By letter dated December 28, 1970, Davis Van & Storage (Mary B. Gehring and Leo M. Gehring doing business as), 912 Fifth Street, Davis, CA 95616, was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 1151 would be automatically revoked or suspended unless a valid surety bond was filed with the Commission on or before January 14, 1971.

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.9 of Federal Maritime Commission General Order 4, further provides that a license will be automatically revoked or suspended for failure of a licensee to maintain a valid surety bond on file.

Davis Van & Storage (Mary B. Gehring and Leo M. Gehring doing business as) has failed to file the required bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 1 (revised), § 7.04(g) (Dated 9-29-70).

It is ordered, That the Independent Ocean Freight Forwarder License No. 1151 be returned to the Commission. Revocation of License No. 1151 is effective January 14, 1971.

It is further ordered, That a copy of this order be published in the FEDERAL REGISTER and served upon Davis Van & Storage (Mary B. Gehring and Leo M. Gehring doing business as).

HAPAG-LLOYD AKTIENGESELLSCHAFT

Publication of Discriminatory Rates; Rescheduling of Filing Dates

Respondent Hapag Lloyd has requested a further enlargement of time within which to respond to the Commission's order to show cause dated December 11, 1970.

Respondent indicates that it has only recently obtained the release of pertinent information by the German Ministry of Transport, and accordingly additional time would be needed for the preparation of submissions in this proceeding. We think the problems encountered by respondent in obtaining clearance from a foreign government constitute cause for a further enlargement of time. We wish to reemphasize, however, that this action does not indicate a diminution of our concern regarding the matters under adjudication herein.

Accordingly, it is ordered,

(1) That requests for evidentiary hearing, affidavits of fact, and memoranda of law shall be filed by respondent on or before February 19, 1971.

(2) That replies thereto by Hearing Counsel and interveners, if any, shall be filed on or before March 8, 1971.

SEA-LAND SERVICE, INC.

Publication of Discriminatory Rates; Rescheduling of Filing Dates

Respondent Sea-Land Service, Inc. has requested a further enlargement of time within which to respond to the Commission's order to show cause dated December 11, 1970.

Respondent cites as grounds therefor the necessity of compressing information at hand in preparing submissions in this proceeding. We have previously afforded a 30-day enlargement of time for respondent, but in so doing, emphasized our concern regarding the matters under adjudication herein. We do not think respondent has shown sufficient cause for the further requested extension of 2 weeks. However, since the current filing date is already at hand a short extension will be granted.

Accordingly, it is ordered,

(1) That requests for evidentiary hearing, affidavits of fact, and memoranda of law shall be filed by respondent on or before February 3, 1971.

(2) That replies thereto by Hearing Counsel and interveners, if any, shall be filed on or before February 18, 1971.

SEATRAN LINES, INC.

Publication of Discriminatory Rates; Rescheduling of Filing Dates

Respondent Seatrain Lines, Inc. has requested a 30-day enlargement of time within which to respond to the Commission's order to show cause dated January 5, 1971. Respondent cites as grounds therefor the time and effort required to assemble materials and prepare submissions and refers to similar extensions afforded carriers in other proceedings.

The Commission wishes to reemphasize its concern regarding the matters under adjudication herein and notes that respondent has effected further rate reductions since institution of this proceeding. Extensions granted in other proceedings were either to foreign based carriers or to carriers which originally had less time to respond than Seatrain and need not serve as a basis for an extension here. Nevertheless, a certain extension of time to respond seems warranted under the circumstances.

Accordingly, it is ordered,

(1) That requests for evidentiary hearing, affidavits of fact, and memoranda of law shall be filed by respondent on or before February 12, 1971.

(2) That replies thereto by Hearing Counsel and interveners, if any, shall be filed on or before February 26, 1971.

Respondent American Export Isbrandtsen Lines, Inc., has requested an enlargement of time within which to respond to the Commission's order to show cause dated January 11, 1971.

Respondent states that additional time is necessary for preparation of affidavits of fact. The request appears reasonable under the circumstances and will be granted. The Commission wishes to emphasize that this action does not indicate, in any way, a diminution in its concern regarding the matters under adjudication herein.

Accordingly, it is ordered,

(1) That requests for evidentiary hearing, affidavits of fact and memoranda of law shall be filed by respondent on or before February 26, 1971.

§ According to Mobil, Buyer, by letter dated Jan. 12, 1971, filed Jan. 14, 1971, contends tax increase is without contract basis.

The proposed tax increase of Mobil is for a sale to Kansas-Nebraska Natural Gas Co., Inc. (Kansas-Nebraska). The buyer states that the tax reimbursement clause in the contract contemplates partial reimbursement in the event of a tax increase, but does not apply to an increase in an assessment, and that under Kansas law an assessment is not a tax. Mobil contends that the increase in assessment was within the contemplation of the parties at the time of execution of the contract. Pending resolution of the contractual issue between Mobil and Kansas-Nebraska the proposed increase is suspended for 1 day from January 1, 1971, the proposed effective date.

CITIES SERVICE OIL CO. ET AL.

Order Providing for Hearing on and Suspension of Proposed Changes in Rates, and Allowing Rate Changes To Become Effective Subject to Refund¹

JANUARY 27, 1971.

The respondents named herein have filed proposed changes in rates and charges of currently effective rate schedules for sales of natural gas under Commission jurisdiction, as set forth in Appendix A hereof.

¹ Does not consolidate for hearing or dispose of the several matters herein.

The proposed changed rates and charges may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon hearings regarding the lawfulness of the proposed changes, and that the supplements herein be suspended and their use be deferred as ordered below.

The Commission orders:

(A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto (18 CFR Ch. I), and the Commission's rules of practice and procedure, public hearings shall be held concerning the lawfulness of the proposed changes.

(B) Pending hearings and decisions thereon, the rate supplements herein are suspended and their use deferred until date shown in the "Date Suspended Until" column, and thereafter until made effective as prescribed by the Natural Gas Act: *Provided, however,* That the supplements to the rate schedules filed by respondents, as set forth herein, shall become effective subject to refund on the date and in the manner herein prescribed if within 20 days from the date of the issuance of this order respondents shall each execute and file under its above-designated docket number with the Secretary of the Commission its agreement and undertaking to comply

with the refunding and reporting procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder, accompanied by a certificate showing service of copies thereof upon all purchasers under the rate schedule involved. Unless respondents are advised to the contrary within 15 days after the filing of their respective agreements and undertakings, such agreements and undertakings shall be deemed to have been accepted.²

(C) Until otherwise ordered by the Commission, neither the suspended supplements, nor the rate schedules sought to be altered, shall be changed until disposition of these proceedings or expiration of the suspension period.

(D) Notices of intervention or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C. 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 and 1.37(f)) on or before March 19, 1971.

By the Commission.

² If an acceptable general undertaking, as provided in Order No. 377, has previously been filed by a producer, then it will not be necessary for that producer to file an agreement and undertaking as provided herein. In such circumstances the producer's proposed increased rate will become effective as of the expiration of the suspension period without any further action by the producer.

† Includes documents relating to the discovery of new reservoirs which entitle applicant to higher ceiling rates in accordance with Opinion No. 567.

‡ Permanent certificated rate. Includes 0.019 cents per Mcf B.T.U. adjustment.

§ Increase limited to the Southern Louisiana proposed settlement rate pursuant to order issued Dec. 24, 1970, in Docket No. R-394. Proposed rate is 26.50 cents per Mcf.

* Rate increase resulting from termination of moratorium in Southern Louisiana pursuant to Order No. 413.

† Applies only to gas sold from the 9300' Sand Reservoir which was discovered after Aug. 1, 1970.

‡ Supplement No. 6 to the subject rate schedule is an amendatory agreement dated Nov. 17, 1970, which was filed concurrently with the increased rate filing. Said supplement is hereby accepted effective as of Jan. 28, 1971.

Under the provisions of the Commission's order issued October 27, 1970 in Docket No. AR69-1, producers in the Southern Louisiana area were able to file for higher contractually authorized rates within 30 days from such order (by Nov. 27, 1970) and were permitted to collect such increased rates subject to refund after 75 days had passed (as of Jan. 10, 1971). The 75-day period applies to those filings made by producers within 30 days of the issuance of the October 27, 1970 order. Producer filings made after Novem-

ber 27, 1970, however, were to be subject to normal Commission suspension procedures. The order, however, left open the question of the appropriate suspension period for filings made after November 27, 1970.

The increases involved here were filed after the November 27, 1970 deadline. In view of the action taken in the procedural order in Docket No. AR69-1 accompanying Order No. 413, we believe it appropriate to suspend and permit an increase filed after November 27, 1970, to become effective subject to refund

on the date from January 10, 1971 that corresponds to the number of days that the filing was made after November 27, 1970. This order so provides.

The producers' proposed increased rates and charges exceed the applicable area price levels for increased rates as set forth in the Commission's statement of general policy No. 61-1, as amended (18 CFR 2.56).

CONTINENTAL OIL CO.**Order Providing for Hearing on and Suspension of Proposed Change in Rate, and Allowing Rate Change To Become Effective Subject to Refund**

JANUARY 27, 1971.

Respondent named herein has filed a proposed change in rate and charge of a currently effective rate schedule for the sale of natural gas under Commission jurisdiction, as set forth in Appendix A hereof.

The proposed changed rate and charge may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon a hearing regarding the lawfulness of the proposed change, and that the supplement herein be suspended and its use be deferred as ordered below.

The Commission orders:

(A) Under the Natural Gas Act, particularly sections 4 and 15, the regula-

tions pertaining thereto (18 CFR Ch. I), and the Commission's rules of practice and procedure, a public hearing shall be held concerning the lawfulness of the proposed change.

(B) Pending hearing and decision thereon, the rate supplement herein is suspended and its use deferred until date shown in the "Date Suspended Until" column, and thereafter until made effective as prescribed by the Natural Gas Act: *Provided, however,* That the supplement to the rate schedule filed by respondent shall become effective subject to refund on the date and in the manner herein prescribed if within 20 days from the date of the issuance of this order respondent shall execute and file under its above-designated docket number with the Secretary of the Commission its agreement and undertaking to comply with the refunding and reporting procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder, accompanied by a certificate showing service of a copy thereof upon the purchaser under the rate schedule involved. Unless respondent is advised to the contrary within 15 days after the

filing of its agreement and undertaking, such agreement and undertaking shall be deemed to have been accepted.¹

(C) Until otherwise ordered by the Commission, neither the suspended supplement, nor the rate schedule sought to be altered, shall be changed until disposition of this proceeding or expiration of the suspension period.

(D) Notices of intervention or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C. 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 and 1.37(f)) on or before March 19, 1971.

NATURAL GAS PIPELINE COMPANY OF AMERICA

Notice of Filing of Stipulation and Agreement

JANUARY 26, 1971.

Take notice that on January 15, 1971, Natural Gas Pipeline Company of America (Natural) submitted for approval a Stipulation and Agreement in Docket No. RP70-42. The Stipulation and Agreement would not resolve all the issues in these proceedings but would provide for the allocation of Natural's gas supply among its customers during the year 1971.

The Stipulation and Agreement provides for (i) the voluntary suspension of the effectiveness of the proposed tariff sheets filed in these proceedings, and as subsequently modified, until December 1, 1971; (ii) the establishment of maximum quantities which Natural is obligated to deliver and which its customers are entitled to purchase in any month during the calendar year 1971; (iii) the waiver of Natural's liability for damages and the application of "Adjustment for Delivery Deficiency" provisions of Natural's rate schedules should Natural fail during any month in 1971 to deliver volumes of gas in excess of any such maximum quantity; (iv) the exemption from the monthly quantity limitations of any customers of Natural whose Daily Contract Quantity is less than 30,000 Mcf, except that such customer may increase its purchases from

Natural only to the extent necessary to meet the requirements of new firm year-round loads, and (v) the modification of the unauthorized monthly over-take provisions of Rate Schedule CD-1 and PL-1.

Copies of the Stipulation and Agreement were served on all parties to these proceedings, all of Natural's jurisdictional customers and interested State commissions.

Answers or comments relating to the proposed Stipulation and Agreement may be filed with the Federal Power Commission, 441 G Street NW., Washington, DC 20426, on or before February 8, 1971.

NATURAL GAS PIPELINE COMPANY OF AMERICA

Notice of Filing of Stipulation and Agreement

JANUARY 26, 1971.

Take notice that on January 15, 1971, Natural Gas Pipeline Company of America (Natural) submitted for approval a Stipulation and Agreement in Docket No. RP70-35. The Stipulation and Agreement would resolve all issues in these proceedings, and provides for a reduction in the increase proposed by Natural in Docket No. RP70-35 and for flow through of refunds.

The Stipulation and Agreement provides for upward adjustment of Natural's rates during 1971 when additional storage capacity is obtained from Michigan Wisconsin Pipeline Co., when additional storage withdrawal facilities are added to Natural's system, when Natural makes certain advance payments for gas; includes a purchase gas adjustment clause which allows Natural to increase its rates and requires Natural to reduce its rates to reflect changes in its purchase gas cost above and below 19.22 cents per Mcf;

requires Natural to flow through to its jurisdictional customers the appropriate portion of all refunds, together with interest, received from its suppliers which are applicable to purchases by Natural from such suppliers during the term of the Stipulation and Agreement, as defined therein; and provides for rate reductions and refunds in the event that Natural's sales during 1971 exceed the estimated sales for 1971 upon which Natural's proposed rates are based.

Copies of the Stipulation and Agreement were served on all parties to these proceedings, all of Natural's jurisdictional customers and interested State commissions.

Answers or comments relating to the proposed Stipulation and Agreement may be filed with the Federal Power Commission, 441 G Street NW., Washington, DC 20426, on or before February 8, 1971.

In Supplement No. 18 which was filed on December 1, 1970, Pan American states that although the contract, as amended May 16, 1966, covered by its FPC Gas Rate Schedule No. 72 would terminate on December 31, 1970, Pan American intended to "continue to

PANHANDLE EASTERN PIPE LINE CO.
Order Setting Date for Formal Hearing,
Prescribing Procedures and Permit-
ting Interventions

JANUARY 29, 1971.

On September 24, 1970, Panhandle Eastern Pipe Line Co. (Panhandle) filed an application pursuant to section 7 of the Natural Gas Act for the issuance of a certificate of public convenience and necessity authorizing the initiation of a Winter Service for Panhandle's existing General Service and Small General Service resale customers under the terms and conditions provided in a proposed new rate schedule and for authorization to increase its existing storage capabilities in order to enable it to provide Winter Service to the foregoing utility customers. Panhandle in conjunction with the aforementioned request also seeks permission to revise its existing interruptible rate schedules as set forth in its aforementioned application which is on file with the Commission.

Panhandle contends that it anticipates gas supply deficiencies during the forthcoming and subsequent winters due to the existing national gas shortage. It proposes to partially alleviate this situation by acquiring additional gas for use during the winter months by purchasing short-term supplies from other pipelines and by converting off-peak transmission capacity into winter deliveries through the expanded use of underground storage.

Panhandle proposes to utilize off-peak transmission capacity to transport additional volumes of gas to its Waverly Storage Field, in Waverly, Ill., in order to effectuate this new service. However, Panhandle contends that it must revise its interruptible rate schedules in order to have the necessary off-peak transmission capacity to deliver the necessary volumes to the storage field. It therefore proposes that future availability of interruptible services should be limited to that which is presently being rendered or which is subject to Commission proceedings that had commenced at the start of the present winter heating season, i.e., prior to October 1, 1970. It proposes herein to reserve all of its remaining excess off-peak capacity for the purpose of supplying gas to its storage reservoirs.

Panhandle further requests authorization to increase the certificated maximum reservoir capacity of the Galesville formation of its Waverly Storage Field from 10,000,000 Mcf to 17,500,000 Mcf, and to augment its capacity for injecting additional off-peak gas through the installation of an additional 1,000-horsepower compressor at the Waverly-Galesville Compressor Station. The proposed compressor unit will cost \$727,000.

Panhandle proposes to make its supplementary Winter Service gas available to certain of its General Service and Small General Service customers at an approved nomination charge of 25 cents

deliver and sell gas to Buyer on a day to day basis" in accordance with the terms and conditions set forth in Exhibit A which is included therein.

Tennessee also filed similar applications for rehearing on December 31, 1970 (with respect to Pan American's filings) and on January 7, 1971 (with respect to Sun Oil Co.'s. (Sun) filing) of Commission letters issued December 18, 1970 accepting Supplements Nos. 14 and 24 to Pan American's FPC Gas Rate Schedules Nos. 73 and 83, respectively, and a Commission letter issued December 8, 1970 accepting Supplement No. 28 to Sun's FPC Gas Rate Schedule No. 37.¹ These other filings by Pan American are similar to Supplement No. 18 to Pan American's FPC Gas Rate Schedule No. 72. Sun in its filing also proposed certain modifications in the existing terms and conditions under which it proposes to continue its sale.

None of these filings involve increased rates. The terms and conditions set forth in the filings reflect unilateral action by Pan American and Sun and have not been agreed to by Tennessee. Tennessee which is the purchaser of natural gas under these rate schedules concurrently with its applications for rehearing also filed petitions for leave to intervene in each of these proceedings.

Tennessee in its applications for rehearing claims that various provisions in each of these filings lack the clarity and definitiveness required under section 4 of the Natural Gas Act, and, depending on the construction given to these provisions, may be unlawful, unjust and unreasonable in violation of section 4 and 7(b) of the Natural Gas Act. Tennessee in this connection specifies its view of the ambiguities and uncertainties which each of these filings creates. Tennessee also claims that Pan American and Sun have no right to make unilateral filings proposing to change the terms and conditions in effect under these contracts after the expiration of such contracts.

In view of the issues raised by Tennessee in its applications for rehearing, we shall grant rehearing and shall set these proceedings for hearing. We shall also provide for a prehearing conference at which the factual matters to be resolved by formal evidentiary hearing, if any, will be ascertained. All matters which can be resolved without a formal presentation should be settled by stipulation. In addition, Pan American and Sun at the prehearing conference shall clarify each of the ambiguities and uncertainties in their respective filings alleged by Tennessee.

In the special circumstances presented here, we also believe it appropriate to provide that the terms and conditions (other than rates) contained in the subject rate schedules prior to the filings herein shall remain in effect pending further Commission order. To do otherwise might create difficulties for

Tennessee, while continuation of the previous terms and conditions should work no hardship on Pan American or Sun pending resolution of these matters. Such action, of course, will have no effect on the right of Pan American or Sun to collect any proposed increased rate filed concurrently with the subject filings or subsequent thereto.

Finally, we shall grant Tennessee's petitions to intervene in these proceedings.

The Commission orders:

(A) For the reasons set forth above, Tennessee's applications for rehearing are granted.

(B) Pending further Commission order, the terms and conditions (other than rates) in effect prior to the subject filings under Pan American's FPC Gas Rate Schedules Nos. 72, 73, and 83 and under Sun's FPC Gas Rate Schedule No. 37 shall continue in effect.

(C) Pursuant to the authority of the Natural Gas Act, particularly sections 4, 5, 7, 14, 15, and 16 thereof, the Commission's rules of practice and procedure and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing shall be held on the issues involved in the above-entitled proceedings.

(D) A Presiding Examiner, to be hereinafter designated by the Chief Examiner, shall preside at both the prehearing conference and the hearing in the above-entitled proceedings.

(E) Pursuant to the provisions of section 1.18 of the Commission's rules of practice and procedure, a prehearing conference in the above-entitled proceedings shall commence at 10 a.m., e.s.t., on March 2, 1971, in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, DC, for the purpose of effectuating this order.

(F) Following the prehearing conference, the Presiding Examiner shall give notice of the date of hearing and shall prescribe such other procedures as he deems appropriate in the disposition of these matters.

(G) Tennessee is permitted to intervene in the proceedings involved here, subject to the rules and regulations of the Commission: *Provided, however*, That Tennessee's participation shall be limited to matters affecting asserted rights and interests specifically set forth in its petitions for leave to intervene: *And, provided, further*, That the admission of Tennessee shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders of the Commission entered in these proceedings.

(H) Notices of intervention or petitions seeking leave to intervene shall be filed with the Federal Power Commission, Washington, D.C. 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 and 1.37(f)) on or before February 22, 1971.

[Docket No. E-7574]

NEW ENGLAND POWER CO.

Order Suspending Tendered Rate Schedules Granting Waiver of Notice Requirements Providing for Hearing and Granting Intervention

JANUARY 28, 1971.

This order suspends for 1 day the operation of tendered rate schedules, orders

a public hearing to be held on the lawfulness of those schedules, grants waiver of notice requirements and permits intervention in this proceeding.

New England Power Co. (NEPCO), a public utility subject to the jurisdiction of this Commission on October 26, 1970, filed rate schedule changes which amend Exhibit D of NEPCO's contract for primary service for resale to Narragansett Electric Co. (Narragansett). The filing was proposed to become effective January 1, 1971. On December 14, 1970, New England Power Service Co. (NEPSCO) submitted on behalf of NEPCO additional material completing the filing¹ and a certificate of concurrence on behalf of Narragansett.²

Narragansett is an affiliate of NEPCO in the New England Electric System. All of Narragansett's generation facilities and certain transmission facilities are integrated with NEPCO's system. NEPCO renders all requirements service to Narragansett and credits Narragansett monthly with the fixed charges on Narragansett's generation and transmission facilities plus actual operating costs.

The effect of the new rate schedule is to increase the credits which NEPCO allows Narragansett from \$678,978 to \$689,510 per month generation credit, and from \$168,309 to \$243,650 per month transmission credit. The increase is the net result of the following changes: (1) Increased investment in facilities; (2) an increase in Narragansett's rate of return from 6.125 percent of 7.3 percent and the associated Federal income tax component; and (3) increase in municipal tax. The proposed increase in credits to Narragansett will total increase in costs to NEPCO of \$1,030,493 annually (10.86 percent).

According to NEPSCO the basis for Narragansett's claimed rate of return of 7.3 percent is the imbedded cost of debt and existing preferred stock, anticipated cost of new preferred stock to be issued in 1971, and a return on equity which, *inter alia*, would provide a minimum level of earnings coverage needed for existing and future debt and allow the company to attract new capital.

NEPCO initially proposed an effective date for the present filing of January 1, 1971, however the original filing was deficient and not completed until December 14, 1970, whereupon NEPCO requested a waiver of the 60-day notice requirement of § 35.13(b)(4) of the Commission's regulations in order for the filing to become effective on January 1, 1971. In consideration of the original filing date of October 22, 1970, and the completed filing date of December 14, 1970, we will grant waiver of that notice requirement to permit the filing to become effective on January 28, 1971, subject to further provisions of this order.

¹ Designated as: New England Power Co., 2d Revised Sheet No. 21 to Rate Schedule FPC No. 161 (superseded 1st Revised Sheet No. 21 to Rate Schedule FPC No. 161).

² Designated as: The Narragansett Electric Co. Supplement No. 4 to Rate Schedule FPC No. 24 (concur in (1) above and supersedes Supplement No. 1 to Rate Schedule No. 24).

Notice of the filing was given by publication in the FEDERAL REGISTER on November 13, 1970 (35 F.R. 17449), stating that any person desiring to be heard or to make any protest with references to said application should on or before November 19, 1970, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with requirements of the Commission's rules of practice and procedure. In reply the Commission has received a notice of intervention by the Rhode Island Division of Public Utilities and Carriers and a protest and petition to intervene by the Power Planning Committee of the Municipal Electric Association of Massachusetts, Inc., and 23 municipal electric plants and departments. The petitioners, who are wholesale customers of NEPCO, contend that the proposed changes would raise NEPCO's cost and absent suspension petitioners will be placed in a position in any forthcoming NEPCO rate case where NEPCO may contend that Narragansett's rates to NEPCO are finally determined and may no longer be challenged. Petitioners therefore requested: (1) Formal hearings be held if the parties are unable to resolve the matter through informal procedures; (2) intervention; and (3) that the proposed changes be suspended for 5 months and made effective subject to investigation and refund or, alternatively that the Commission accept the filing subject to a full review of costs for propriety and reasonableness in all respects in any forthcoming NEPCO rate case. No answer to the petition has been received.

On January 15, 1971, NEPCO filed a general rate increase to its wholesale customers, including petitioners, containing an adjustment and its cost of service to include the full increase in Narragansett's credits in the subject rate filing.

A preliminary review of the filing indicates that the rate of return allowed Narragansett may be excessive. In view of this and the petition of NEPCO's customers, suspension of the proffered filing is appropriate. However, inasmuch as the present implementation of the filing subject to refund would not directly increase costs to NEPCO's customers, we believe that it is appropriate and in the public interest to suspend the tendered rate schedules for 1 day.

The Commission finds:

(1) The tendered rate schedule filing designated in footnotes (1) and (2) herein may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful under the Federal Power Act.

(2) Good cause has been shown to grant NEPCO's request for waiver of the 60-day provision of § 35.13(b)(4) of the Commission's regulations under the Federal Power Act.

(3) It is necessary and appropriate for the purposes of the Federal Power Act, particularly sections 205, 206, 301, 307, 308, and 309 thereof, that the Commission enter upon a hearing concerning the lawfulness of the tendered filing and that the tendered filing be suspended and the use thereof be deferred and a public hearing be initiated in accordance with

the procedures set forth below, all as hereinafter provided.

(4) Participation by the aforementioned petitioners for intervention in this proceeding may be in the public interest.

(5) The period of public notice given in this matter is reasonable.

The Commission orders:

(A) NEPCO's request for waiver of the 60-day provision of § 35.13(b)(4) of the Commission's regulations under the Federal Power Act is hereby granted to permit the tendered filing to take effect January 28, 1971, subject to the provisions of this order.

(B) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Federal Power Act and pursuant to the Commission's rules of practice and procedure, a public hearing shall be convened at the offices of the Federal Power Commission in Washington, D.C., at a date and time to be set by further order of the Commission, concerning the lawfulness of NEPCO's rate schedules identified in footnotes (1) and (2) herein.

(C) Pending such hearing and decision thereon, the tendered rate schedules designated in footnotes (1) and (2) herein are hereby suspended and the use thereof deferred until January 29, 1971. On that day those filings shall take effect in the manner prescribed by the Federal Power Act; and NEPCO, subject to further orders of the Commission, shall charge and collect the new rates and charges set forth in those filings for all power sold and delivered thereunder.

(D) NEPCO shall refund at such times and in such manner as may be required by final order of the Commission the portion of the increased rates and charges found by the Commission in this proceeding not justified, together with interest at the New York prime rate on January 29, 1971, from the date of payment until refunded; shall bear all costs of any such refunding; shall keep accurate accounts in detail of all the amounts received by reason of the increased rates and charges effective as of January 29, 1971, for each billing period; and shall report (original and one copy) in writing and under oath, to the Commission monthly, for each billing period, the billing determinants of electric energy sold and delivered under the subject rate schedules, and the revenues resulting therefrom as computed under the rates in effect immediately prior to January 29, 1971, and under the rates and charges made effective by this order, together with the differences in the revenues so computed.

(E) The Power Planning Committee of the Municipal Electric Association of Massachusetts, Inc., and the electrical departments and plants of the Massachusetts towns and cities of Ashburnham, Boylston, Danvers, Georgetown, Groton, Hingham, Holden, Hudson, Hull, Ipswich, Littleton, Mansfield, Marblehead, Merrimac, Middleton, North Attleboro, Paxton, Peabody, Princeton, Shewsbury, Sterling, Templeton, and West Boylston are hereby permitted to intervene in this

proceeding subject to the rules and regulations of the Commission: *Provided further*, That the admission of such interveners shall not be construed as recognition by the Commission that they or any of them might be aggrieved by any orders entered in this proceeding.

(F) Unless otherwise ordered by the Commission, NEPCO shall not change the terms or provisions of the subject rate schedules or of its presently effective rate schedules until this proceeding has been terminated or until the period of suspension has expired.

(G) Notices of intervention and petitions to intervene may be filed with the Federal Power Commission, Washington, D.C. 20426, on or before February 22, 1971, in accordance with the Commission's rules of practice and procedure (18 CFR 1.8 or 1.37).

[Docket No. CP71-190]

COLORADO INTERSTATE GAS CO.

Notice of Application

JANUARY 29, 1971.

Take notice that on January 25, 1971, Colorado Interstate Gas Co., a division of Colorado Interstate Corp. (applicant) filed in Docket No. CP71-190 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities to expand its transmission system peak day sales capacity by 90,000 Mcf per day, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Applicant proposes the following construction:

(1) A 3,400-horsepower addition at the existing Laramie Compressor Station.

(2) A new 4,000-horsepower compressor station near Wamsutter, Wyo.

(3) A 8,000 Mcf-per day capacity inert gas generation plant at the Laramie Compressor Station.

(4) Approximately 49 miles of 24-inch pipeline loop on the 22-inch Wyoming main line from the Laramie Compressor Station to a point about 22 miles west of Cheyenne, Wyo.

(5) Five new gas storage wells to be drilled and connected at the Fort Morgan Storage Field in Morgan County, Colo.

(6) One existing well to be connected at the Fort Morgan Storage Field.

(7) Approximately 16 miles of 26-inch pipeline loop on the Pueblo to Watkins 20-inch main line from Watkins Junction south to the Littleton Lateral take-off.

Applicant states that the proposed expansion will assist it in meeting the increased peak day requirements of existing customers and will better enable it to satisfy estimated annual requirements through increased capacity for trans-

porting available supply volumes from Wyoming sources to market. The best estimate of the capacity to be generated by the projects proposed herein is 90,000 Mcf of natural gas per day.

The cost of the facilities proposed is estimated to be \$13,990,109 which cost applicant states will be financed from current working funds, funds for operations, short-term borrowings, or long-term debt.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 22, 1971, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

GORDON M. GRANT,
Secretary.

[Docket No. RP71-77]

CONSOLIDATED GAS SUPPLY CORP.

Order Providing for Hearing, Suspending Proposed Revised Tariff Sheets, Providing Hearing Procedures, and Rejecting for Filing Revised Tariff Sheets Containing Purchased Gas Adjustment Provision

JANUARY 29, 1971.

Consolidated Gas Supply Corp. (Consolidated) on December 17, 1970, tendered for filing proposed changes in its FPC Gas Tariff, First Revised Volume No. 1 and Original Volume No. 2, to

become effective on February 1, 1971.¹ The proposed rate changes, based on a cost of service study for the 12-month period ending September 30, 1970, as adjusted, would increase Consolidated's rates and charges by approximately \$30,248,118 over the settlement rates in Docket No. RP69-19 et al., approved by Commission order issued September 18, 1970, in that docket, as adjusted to include a tracking increase which became effective November 1, 1970.

Consolidated states that the rate increase is required to compensate it for increased gas costs of approximately \$15.9 million, increased cost of Consolidated's capital justifying an increase to a 9-percent rate of return, an increase in the annual depreciation rates for transmission and underground storage plant to 3.5 percent, and on other depreciable properties to a composite depreciation rate of 5 percent, increased operating expenses, normalization of liberalized depreciation for Federal and State income tax purposes, the use of a 5-year average for exploration and development expenses, and changes in Federal, State, and local taxes.

Consolidated's filing includes tariff sheets providing for new rate schedules applicable to small customers (under 5,000,000 Mcf annually) in Zone 4 under the provisions of the rate settlement in Docket No. RP69-19 et al.² The company states that it proposes to request the Commission to make these tariff sheets effective at such time as the order approving the settlement in Docket No. RP69-19 et al. becomes final and nonappealable.

Consolidated's filing also includes revised tariff sheets which contain a purchased gas cost adjustment provision. Consolidated requests that if the Commission should reject the tariff sheets containing the purchased gas cost adjustment pursuant to § 154.38(d)(3) of the regulations under the Natural Gas Act, that the Commission waive such of the Commission's rules as may be necessary to permit the clause to be filed or

made the subject of hearings in this proceeding.

The reasonableness of including a purchased gas adjustment provision in Consolidated's tariff has not been tested in any evidentiary proceeding. If accepted at this time, this provision would become operative after suspension. The purchased gas adjustment provision raises a number of substantive issues which should be fully explored and resolved before the rates and charges to Consolidated's customers are subjected to changes by application of this proposed adjustment provision. Accordingly, we deem it inappropriate at this time to waive the provisions of § 154.38(d)(3) of the Commission's regulations under the Natural Gas Act to permit the filing of Consolidated's tariff sheets designated First Revised Sheets Nos. 52 and 53 and Original Sheets Nos. 53-A, 53-B, and 53-C, containing the purchased gas adjustment provision. During the pendency of this proceeding, and prior to the termination of the issue, however, Consolidated will not be precluded from requesting permission to track supplier rate increases which increase the purchased gas costs filed by Consolidated in this proceeding.

Review of the rate filing indicates that issues are raised which require development in evidentiary proceedings. The proposed increased rates and charges have not been shown to be justified and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds:

(1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the rates and charges contained in Consolidated's FPC Gas Tariff, as proposed to be amended herein, and that the proposed tariff sheets listed in footnote (1) above (excluding those tariff sheets which contain a purchase gas cost adjustment clause) be suspended, and the use thereof be deferred as herein provided.

(2) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the disposition of this proceeding be expedited in accordance with the procedures set forth below.

(3) Consolidated's revised tariff sheets containing the purchased gas cost adjustment provisions should be rejected.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 5 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR, Ch. I), a public hearing be held commencing on April 27, 1971, at 10 a.m., e.s.t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, DC 20426, concerning the lawfulness of the rates, charges, classifications, and services contained in Consolidated's FPC Gas Tariff as proposed to be revised herein.

(B) Pending such hearing and decision thereon, Consolidated's revised tariff sheets listed in footnote (1) above except First Revised Sheets Nos. 52 and 53 and Original Sheets Nos. 53-A, 53-B, and 53-C are hereby suspended and the use thereof is deferred until July 1, 1971, and until such further time as they are made effective in the manner prescribed by the Natural Gas Act. As to the revised tariff sheets filed under the provisions of the settlement in Docket No. RP69-19 et al. listed in footnote (2) above when the said settlement becomes final and nonappealable Consolidated may take such action as it deems proper to make these revised tariff sheets effective.

(C) Consolidated's First Revised Sheets Nos. 52 and 53 and Original Sheets Nos. 53-A, 53-B, and 53-C containing a purchased gas adjustment provision are hereby rejected for filing. These proposed tariff sheets may be made a part of the record herein, to be considered, along with any modifications thereof or alternative provisions submitted by the parties or the Commission Staff, as a proposed purchased gas adjustment provision to be included in Consolidated's tariff.

(D) At the hearing on April 27, 1971, Consolidated's prepared testimony (Statement P) together with its entire rate filing as submitted and served on December 17, 1970, be admitted to the record as Consolidated's complete case-in-chief as provided by § 154.63(e)(1) of the Commission's regulations under the Natural Gas Act, and Order No. 254, 28 FPC 495, subject to appropriate motions, if any, by parties to the proceeding.

(E) Following admission of Consolidated's complete case-in-chief, the parties shall proceed to effectuate the intent and purpose of § 2.59 of the Commission's rules of practice and procedure and of this order as set forth above.

(F) On or before June 15, 1971, the Commission's Staff shall serve its prepared testimony and exhibits. The prepared testimony and exhibits of any and all intervenors shall be served on or before June 25, 1971. Any rebuttal evidence by the company shall be served on or before July 19, 1971. Hearing on the issues will commence on July 27, 1971. The Presiding Examiner, upon a showing of good cause, may grant such extensions of time as he deems appropriate in the circumstances.

(G) A Presiding Examiner to be designated by the Chief Examiner for that purpose (See Delegation of Authority, 18 CFR 3.5(d)), shall preside at the hearing in this proceeding; shall prescribe relevant procedural matters not herein provided, and shall control this proceeding in accordance with the policies expressed in § 2.59 of the Commission's rules of practice and procedure.

By the Commission.

[Docket No. RP71-87]

MISSISSIPPI RIVER TRANSMISSION CORP.

Order Providing for Hearing, Suspending Proposed Revised Tariff Sheets, Providing Hearing Procedure, and Rejecting for Filing Alternate Revised Tariff Sheets Containing Purchased Gas Adjustment Provision

JANUARY 29, 1971.

Mississippi River Transmission Corp. (Mississippi) on December 31, 1970, tendered for filing proposed changes in its FPC gas tariff to become effective as of February 1, 1971.¹ The proposed rate changes, based on a cost of service study for the 12-month period ending September 30, 1970, as adjusted, would increase Mississippi's charges for jurisdictional sales and services by approximately \$10,600,000 per annum over the settlement rates in Docket No. RP70-1, approved by Commission order issued April 13, 1970.

Mississippi states that the rate increase is required due to an increased cost of Mississippi's capital, justifying an increase to a 10.5 percent overall rate of return; an increase in purchased gas costs stemming from tracking suppliers' rate increases and from changes in gas purchase pattern; increased operating costs, including wages; increased taxes; an increase in the annual depreciation rates to 5 percent; and a return to normalization accounting for liberalized depreciation in determining Federal income taxes for cost of service purposes.

Mississippi's filing also proposes to eliminate the low summer rate contained in the PI-1 rate schedule, substituting a single rate applicable during the entire year; change the interest charge for late payments from 6 percent per annum to the prime rate charged by the First National City Bank, New York; and include a purchased gas adjustment clause in its tariff.

Mississippi's filing includes an alternate set of revised tariff sheets, which contain a purchased gas adjustment provision. Mississippi requests waiver of the provisions of the regulations under the Natural Gas Act, § 154.38(d)(3), for purposes of accepting for filing the proposed tariff sheets incorporating the proposed gas adjustment clause in its tariff. If such waiver is not granted, Mississippi requests consideration of the alternative set.

¹The proposed revised tariff sheets filed are as follows: Revised Tariff Sheets (Without Purchased Gas Cost Adjustment)—11th Revised Sheet No. 4; 7th Revised Sheet No. 5; 6th Revised Sheet No. 6; 4th Revised Sheet No. 7B; 1st Revised Sheet No. 21; 1st Revised Sheet No. 22; Revised Tariff Sheets (With Purchased Gas Cost Adjustment)—Sheet No. 22; 3d Revised Sheet No. 27, and 6th Revised Sheet No. 1; Original Sheet No. 3A; 11th Revised Sheet No. 4; 7th Revised Revised Sheet No. 7; 4th Revised Sheet No. 7B; 1st Revised Sheet No. 21; 1st Revised Original Sheets Nos. 27A-27I (inclusive).

The reasonableness of including a purchased gas adjustment provision in Mississippi's tariff has not been tested in any evidentiary proceeding. If accepted at this time, this provision would become operative after suspension. The purchased gas adjustment provision raises a number of substantive issues, which should be fully explored and resolved before the rates and charges to Mississippi's customers are subjected to changes by application of this proposed adjustment provision. Accordingly, we deem it inappropriate at this time to waive the provisions of § 154.38(d)(3) of the Commission's regulations under the Natural Gas Act to permit the filing of those tariff sheets of Mississippi containing the purchased gas adjustment provision. During the pendency of this proceeding, and prior to the determination of this issue, however, Mississippi will not be precluded from requesting permission to track supplier rate increases which increase the purchased gas costs filed by Mississippi in this proceeding.

Review of the rate filing indicates that issues are raised which require development in evidentiary proceedings. The proposed increased rates and charges have not been shown to be justified and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds:

(1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the rates and charges contained in Mississippi's FPC gas tariff, as proposed to be amended herein, and that the proposed tariff sheets listed in footnote 1 above (excluding those tariff sheets which contain a purchased gas adjustment clause) be suspended, and the use thereof be deferred as herein provided.

(2) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the disposition of this proceeding be expedited in accordance with the procedures set forth below.

(3) Mississippi's alternate revised tariff sheets containing the purchased gas cost adjustment provisions should be rejected.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 2 and 5 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing will be held commencing on April 20 at 10 a.m., e.s.t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, DC 20426, concerning the lawfulness of the rates, charges, classifications, and services contained in Mississippi's FPC gas tariff as proposed to be revised herein.

(B) Pending such hearing and decision thereon, Mississippi's revised tariff sheets listed in footnote 1 above, except

those tariff sheets which contain a purchased gas adjustment provision, are hereby suspended and the use thereof deferred until July 1, 1971, and until such further time as they are made effective in the manner prescribed by the Natural Gas Act.

(C) Mississippi's revised tariff sheets listed in footnote 1 containing a purchased gas adjustment provision are hereby rejected for filing. These proposed tariff sheets may be made a part of the record herein, to be considered, along with any modifications thereof or alternative provisions submitted by the parties or the Commission Staff, as a proposed purchased gas adjustment provision to be included in Mississippi's tariff.

(D) At the hearing on April 20, 1971, Mississippi's prepared testimony (Statement P), together with its entire rate filing as submitted and served on December 31, 1970, be admitted to the record as Mississippi's complete case-in-chief as provided by § 154.63(e)(1) of the Commission's regulations under the Natural Gas Act, and Order No. 254, 28 FPC 495, subject to appropriate motions, if any, by parties to the proceeding.

(E) Following admission of Mississippi's complete case-in-chief, the parties shall proceed to effectuate the intent and purpose of § 2.59 of the Commission's rules of practice and procedure and of this order as set forth above.

(F) On or before June 1, 1971, the Commission Staff shall serve its prepared testimony and exhibits. The prepared testimony and exhibits of any and all intervenors shall be served on or before June 11, 1971. Any rebuttal evidence by Mississippi shall be served on or before July 5, 1971. Hearing on the issues will commence July 15, 1971. The Presiding Examiner, upon a showing of good cause, may grant such extensions of time as he deems appropriate.

(G) A Presiding Examiner to be designated by the Chief Examiner for that purpose (see Delegation of Authority, 18 CFR 3.5(d)), shall preside at the hearing in this proceeding; shall prescribe relevant procedural matters not herein provided, and shall control this proceeding in accordance with the policies expressed in § 2.59 of the Commission's rules of practice and procedure.

By the Commission.

FEDERAL RESERVE SYSTEM

BARNETT BANKS OF FLORIDA, INC.

Order Approving Acquisition of Bank Stock by Bank Holding Company

In the matter of the application of Barnett Banks of Florida, Inc., Jacksonville, Fla., for approval of acquisition of 80 percent or more of the voting shares

of International Bank of Tampa, Tampa, Fla.

There has come before the Board of Governors, pursuant to section 3(a)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(3)) and § 222.3(a) of Federal Reserve Regulation Y (12 CFR 222.3(a)), the application of Barnett Banks of Florida, Inc., Jacksonville, Fla. (Applicant), a registered bank holding company, for the Board's prior approval of the acquisition of 80 percent or more of the voting shares of International Bank of Tampa, Tampa, Fla. (Bank).

As required by section 3(b) of the Act, the Board gave written notice of receipt of the application to the Florida Commissioner of Banking and requested his views and recommendation. The Commissioner recommended approval of the application.

Notice of receipt of the application was published in the FEDERAL REGISTER on December 16, 1970 (35 F.R. 19036), providing an opportunity for interested persons to submit comments and views with respect to the proposal. A copy of the application was forwarded to the U.S. Department of Justice for its consideration. Time for filing comments and views has expired and all those received have been considered by the Board.

The Board has considered the application in the light of the factors set forth in section 3(c) of the Act, including the effect of the proposed acquisition on competition, the financial and managerial resources and future prospects of the Applicant and the banks concerned, and the convenience and needs of the communities to be served. Upon such consideration, the Board finds that:

Applicant is the third largest banking organization in Florida controlling 24 banks with \$626 million in deposits, representing 5.1 percent of the deposits held by all banking organizations in the State. (All banking data are as of June 30, 1970, adjusted to reflect holding company formations and acquisitions approved by the Board through Dec. 31, 1970.) Applicant's acquisition of Bank (deposits of \$13 million) would increase its share of deposits in the State by only one tenth of 1 percent. Bank is one of the smaller banks in Tampa, and is the 16th largest of 23 commercial banks serving Hillsborough County (other than Plant City), holding only 1.6 percent of the deposits in that area.

Applicant's two closest subsidiaries to Bank are located 23 miles from Bank in Pinellas County, across Tampa Bay. Because of the location of the three banks there is little meaningful competition between these two subsidiaries and Bank and little possibility that more competition will develop in the future. Through affiliation with Applicant, Bank would be in a stronger position to compete with its much larger competitors in Hillsborough County, two of which each have deposits in excess of \$190 million. Because of this factor, the acquisition of Bank is likely to have a procompetitive effect in the Hillsborough County area.

Based upon the foregoing, the Board concludes that consummation of the pro-

posed acquisition would not have an adverse effect on competition in any relevant area. The banking factors as they pertain to Applicant and its subsidiary banks are consistent with approval of the application, and as they pertain to Bank lend support for approval. Applicant plans to provide Bank with additional capital and with stronger management. Considerations relating to the convenience and needs of banking customers in Hillsborough County are consistent with approval of the application. It is the Board's judgment that the proposed transaction would be in the public interest and should be approved.

It is hereby ordered, For the reasons set forth in the findings summarized above, that said application be and hereby is approved: *Provided*, That the action so approved shall not be consummated (a) before the 30th calendar day following the date of this order or (b) later than 3 months after the date of this order, unless such time be extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors,
January 28, 1971.

Deputy Secretary.

FIRST BANC GROUP OF OHIO, INC.

Notice of Application for Approval of Acquisition of Shares of Bank

Notice is hereby given that application has been made, pursuant to section 3(a)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(3)), by First Banc Group of Ohio, Inc., which is a bank holding company located in Columbus, Ohio, for prior approval by the Board of Governors of the acquisition by applicant of 100 percent (less directors' qualifying shares) of the voting shares of the successor by merger of The Security Central National Bank of Portsmouth, Portsmouth, Ohio.

Section 3(c) of the Act provides that the Board shall not approve:

(1) Any acquisition or merger or consolidation under section 3 which would result in a monopoly, or which would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of banking in any part of the United States, or

(2) Any other proposed acquisition or merger or consolidation under section 3 whose effect in any section of the country may be substantially to lessen competition, or to tend to create a monopoly, or which in any other manner would be in restraint of trade, unless the Board finds that the anticompetitive effects of the proposed transaction are clearly outweighed in the public interest by the probable effect of the transaction in

MISSOURI BANCSHARES, INC.

Order Approving Acquisition of Bank Stock by Bank Holding Company

In the matter of the application of Missouri Bancshares, Inc., Kansas City, Mo., for approval of acquisition of 80 percent or more of the voting shares of First Security Bank in Kirkwood, Kirkwood, Mo.

There has come before the Board of Governors, pursuant to section 3(a)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(3)), and § 222.3 (a) of Federal Reserve Regulation Y (12 CFR 222.3(a)), the application of Missouri Bancshares, Inc., Kansas City, Mo., (Applicant), a registered bank holding company, for the Board's prior approval of the acquisition of 80 percent or more of the voting shares of First Security Bank in Kirkwood, Kirkwood, Mo. (Bank).

As required by section 3(b) of the Act, the Board gave written notice of receipt of the application to the Missouri Commissioner of Finance and requested his views and recommendation. The Commissioner stated he did not object to approval of the application.

Notice of receipt of the application was published in the FEDERAL REGISTER on December 12, 1970 (35 F.R. 18934), providing an opportunity for interested persons to submit comments and views with respect to the proposal. A copy of the application was forwarded to the U.S. Department of Justice for its consideration. Time for filing comments and views has expired and all those received have been considered by the Board.

The Board has considered the application in the light of the factors set forth in section 3(c) of the Act, including the effect of the proposed acquisition on competition, the financial and managerial resources and future prospects of the Applicant and the banks concerned, and the convenience and needs of the communities to be served. Upon such consideration the Board finds that:

Applicant controls five banks with deposits of \$261 million representing approximately 3½ percent of the commercial bank deposits in Missouri. It is the fourth largest holding company and fifth largest banking organization in the State. (All banking data are as of June 30, 1970, and reflect holding company acquisitions approved by the Board through Dec. 31, 1970). Bank (deposits of \$21 million) is located 15 miles southwest of downtown St. Louis. The proposal represents Applicant's first entry into the St. Louis area, and Applicant's nearest subsidiary

to Bank is located 135 miles west of Kirkwood in Boonville. No significant competition between Bank and Applicant's subsidiaries exists, and, because of distances and restrictive State branching laws, such competition is unlikely to develop. Bank is the smaller of two banks in Kirkwood, and the third largest of seven banks serving the city and environs with 19 percent of that area's deposits. The largest bank, which controls 26 percent of area deposits, is owned by the individual who controls Bank. Acquisition by Applicant of Bank would terminate the affiliation and would result in an additional banking alternative for area residents.

Based upon the foregoing, the Board concludes that consummation of the proposed acquisition would not have a substantially adverse effect on competition in any area, and could stimulate competition in the Kirkwood area. The banking factors are consistent with approval of the application. The banking needs of Bank's customers are being adequately served, although consummation of the acquisition would provide an additional alternative for such services as trust services. It is the Board's judgment that the proposed transaction would be in the public interest, and that the application should be approved.

It is hereby ordered, For the reasons set forth in the findings summarized above, that said application be and hereby is approved: *Provided*, That the action so approved shall not be consummated (a) before the 30th calendar day following the date of this order or (b) later than 3 months after the date of this order, unless such time be extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,¹ January 28, 1971.

Deputy Secretary.

Manassas, Va., by merger into a nonoperating bank of which applicant plans to own all the shares.

Section 3(c) of the Act provides that the Board shall not approve:

(1) Any acquisition or merger or consolidation under section 3 which would result in a monopoly, or which would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of banking in any part of the United States, or

(2) Any other proposed acquisition or merger or consolidation under section 3 whose effect in any section of the country may be substantially to lessen competition, or to tend to create a monopoly, or which in any other manner would be in restraint of trade, unless the Board finds that the anticompetitive effects of the proposed transaction are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served.

Section 3(c) further provides that, in every case, the Board shall take into consideration the financial and managerial resources and future prospects of the company or companies and the banks concerned, and the convenience and needs of the community to be served.

Not later than thirty (30) days after the publication of this notice in the FEDERAL REGISTER, comments and views regarding the proposed acquisition may be filed with the Board. Communications should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The application may be inspected at the office of the Board of Governors or the Federal Reserve Bank of Richmond.

FEDERAL TRADE COMMISSION

STATEMENT OF ORGANIZATION

Miscellaneous Amendments

Notice is hereby given that the Statement of Organization published June 30, 1970 (35 F.R. 10627) is revised by abolishing the Office of Economic Adviser and the Office of Congressional Relations attached to the Office of the Chairman, and by providing for the signing of correspondence and official papers in the absence of the Secretary by an Acting Secretary designated by the Commission.

1. Section 8 is revised to read as follows:

Sec. 8. *The Chairman.* The Chairman of the Commission is designated by the President, and subject to the general policies of the Commission, is the executive and administrative head of the agency. He presides at meetings of and hearings before the Commission and participates with other Commissioners in all Commission decisions. Attached to

the Office of the Chairman, and reporting directly to him, and through him to the Commission, is the following staff unit:

(a) The Office of Public Information furnishes information concerning Commission activities to news media and the public.

2. Section 12 is revised to read as follows:

Sec. 12. *Office of the Secretary.* The Secretary is responsible for the minutes of Commission meetings and is the legal custodian of the Commission's seal, property, papers, and records, including legal and public records. He, or in his absence an Acting Secretary designated by the Commission, signs Commission orders and official correspondence, and coordinates all liaison activities with the executive and administrative government departments and agencies. The Office of the Secretary maintains a current index of opinions, orders, statements of policy and interpretations, staff manuals and instructions that affect any member of the public, and other public records of the Commission; makes available for inspection and copying all public records of the Commission; is responsible for publication of all Commission action which must appear in the FEDERAL REGISTER and publication of the Federal Trade Commission Decisions and the Statutes and Court Decisions involving the Commission; maintains the Commission's procedures and rules of practice; and screens incoming correspondence addressed to the Commission, provides acknowledgments and replies to the extent appropriate and practicable, and routes correspondence requiring more specialized or detailed attention to the appropriate offices and bureaus for reply.

By directions of the Commission dated December 3, 1970, and January 26, 1971.

INTERNATIONAL JOINT COMMISSION—UNITED STATES AND CANADA

AIR POLLUTION; DETROIT/ WINDSOR—SARNIA/PORT HURON

Public Hearings

At the request of the Governments of Canada and the United States, the Commission is investigating air pollution in the above areas to ascertain whether the air is being polluted on either side of the international boundary by quantities of contaminants that are detrimental to the public health, safety, or general welfare of citizens or to property on the other side of the international boundary, and the sources of any such pollution. If such air pollution is taking place, the Commission is also to recommend the most practical remedial measures.

A report to the Commission by its International St. Clair-Detroit Air Pollution Board, entitled "Joint Air Pollution Study of St. Clair-Detroit River Areas", was released to the public on February 4, 1971. Copies may be obtained from the Commission's Secretaries in Ottawa or Washington.

In order to provide convenient opportunity for all those interested to be heard regarding either the matter under investigation or the said report of its Board, the Commission will conduct public hearings at the times and places listed hereunder. Evidence presented will be considered by the Commission and its advisers in formulating its report and recommendations to the two Governments.

Oral and documentary evidence and relevant argument may be presented at the hearings in person or by counsel. While not mandatory, written statements are desirable to insure accuracy of the

record. It is desirable also that, if possible, fifteen (15) copies of any written statement be filed with each Secretary ten (10) days in advance of the hearing, for the advance information of the Commission and its advisers. A statement thus filed in advance should indicate at which hearing it is to be placed in the record and whether an oral summary will be made at that hearing. Additional copies of written statements may be deposited with the Secretaries at the hearings, for distribution to the news media and others interested.

POSTAL RATE COMMISSION

[Docket No. R71-1]

POST OFFICE DEPARTMENT

Notice of Proposed Increases in Postal Rates and Fees

FEBRUARY 2, 1971.

Take notice that on February 1, 1971, the U.S. Post Office Department (POD) filed in Docket No. R71-1 a Request for Recommended Decision on Changes in Rates of Postage and Fees for Postal Services, pursuant to section 3622 of the Postal Reorganization Act (the Act). The POD maintains that, without changes in rates of postage and fees for postal service, and allowing for the congressional appropriations anticipated by the POD, there will be a revenue deficiency in fiscal year 1972. The POD states that if this Commission submits a recommended decision as requested, the POD will place into effect the proposed new rates and fees which are designed to generate from mail users additional revenues of \$1,454,440,000 during fiscal year 1972.

The POD requests changes in rates of postage and fees for the following classes of mail: First-class mail and air-mail, second-class mail; controlled circulation and third-class mail, fourth-class mail, registered mail, and special delivery mail. The specific changes in

rates and fees proposed are contained in the attached schedules.¹

If any person desires to be heard with reference to said Request and to become a party to a proceeding or to participate as a party in any hearing on the request, that person should file a petition for leave to intervene. Petitions for leave to intervene must be filed with the Secretary, Postal Rate Commission, Washington, D.C. 20268 on or before February 23, 1971, and must be in accordance with section 20 of the Commission's rules of practice. The Commission also calls attention to section 20(b) which provides that petitions for leave to intervene shall affirmatively state whether or not petitioner requests a hearing or, in lieu thereof, a conference.

The request of the POD for recommended decision on changes in rates of postage and fees for postal services is on file with the Commission and available for public inspection.

WORKER'S PETITION FOR DETERMINATION OF ELIGIBILITY TO APPLY FOR ADJUSTMENT ASSISTANCE

Notice of Investigation

On the basis of a petition filed under section 301(a) (2) of the Trade Expansion Act of 1962, on behalf of the workers of Plant No. 33, McDonald Machine Shop, 7600 South Racine Avenue, Chicago, IL, the U.S. Tariff Commission, on January 29, 1971, instituted an investigation under section 301(c) (2) of the Act to determine whether, as a result in major part of concessions granted under trade agreements, articles like or directly competitive with the can-sealing machines and parts thereof produced by said plant are being imported into the United States in such increased quantities as to cause, or threaten to cause, the unemployment or underemployment of a significant number or proportion of the workers of such manufacturing company.

The petitioners have not requested a public hearing. A hearing will be held on request of any other party showing a proper interest in the subject matter of the investigation, provided such request is filed within 10 days after the notice is published in the FEDERAL REGISTER.

The petition filed in this case is available for inspection at the Office of the Secretary, U.S. Tariff Commission, Eighth and E Streets NW., Washington, DC, and at the New York City Office of the Tariff Commission located in Room 437 of the Customhouse.

¹ Schedules filed as part of the original document. Schedules will appear in full text as part of the Post Office Department's notice of proposed increases in postal rates and fees.

LSL CORP.

Notice of Filing of Application for Order Declaring Applicant Not To Be an Investment Company

JANUARY 29, 1971.

Notice is hereby given that LSL Corp. (Applicant), 404 West Oak, Denton, TX 76201, a Texas corporation, has filed an application pursuant to section 3(b) (2) of the Investment Company Act of 1940 (Act) for an order of the Commission finding and declaring that Applicant is primarily engaged, through controlled companies, in a business other than that of investing, reinvesting, owning, holding or trading in securities. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant owns 178,055 shares (29.7 percent) of the outstanding common stock of Lifetime Security Life Insurance Co. (Lifetime), a legal reserve life insurance company organized in Texas. At August 31, 1970, Applicant's investment in Lifetime represented 58 percent of Applicant's total assets per books of \$3,122,197. Applicant asserts that it controls Lifetime, of which it is by far the largest stockholder. The officers and directors of Applicant own an additional 18.7 percent of the common stock of Lifetime. The president of Applicant is also president of Lifetime and his primary working time is spent on the affairs of Lifetime.

In 1970, Applicant formed Lifetime Security Life Insurance Company of Oklahoma and owns 251,476 shares (68.2 percent) of its outstanding common stock. At August 31, 1970, Applicant's investment in this company represented 16.9 percent of Applicant's total assets per books.

Applicant represents that it has always been and remains the intention of Applicant to operate primarily in the insurance and related fields through controlled companies.

Section 3(a) (3) of the Act defines as an investment company any issuer which is engaged, or proposes to engage, in the business of investing, reinvesting, owning, holding, or trading in securities, and owns or proposes to acquire investment securities having a value exceeding 40 percent of the value of such issuer's total assets (exclusive of Government securities and cash items) on an unconsolidated basis. The securities of Lifetime owned by Applicant constitute invest-

ment securities as that term is defined in section 3(a) of the Act.

Section 3(b) (2) of the Act excepts from the definition of an investment company in section 3(a) (3), any issuer which the Commission finds and by order declares to be primarily engaged in a business other than that of investing, reinvesting, owning, holding, or trading in securities, either directly or (A) through majority-owned subsidiaries or (B) through controlled companies conducting similar types of business.

Notice is further given that any interested person may, not later than February 12, 1971, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address set forth above. Proof of such service (by affidavit or in case of an attorney at law by certificate) shall be filed contemporaneously with the request. At any time thereafter, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the matter may be issued upon the basis of the information stated in the application, unless an order for hearing upon this matter shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation pursuant to delegated authority.

NEW ENGLAND ELECTRIC SYSTEM ET AL.

Notice of Proposed Issue and Sale of Notes by Subsidiary Companies to Banks, Commercial Paper Dealers, and/or to Holding Companies and Retirement of Outstanding Notes

JANUARY 27, 1971.

Notice is hereby given that an application-declaration has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 (Act) by New England Electric System (NEES), 20 Turnpike Road, Westboro, MA 01581, a registered holding company, and certain of its subsidiary companies (the borrowing companies), namely,

Central Massachusetts Gas Co. (Central), Granite State Electric Co. (Granite), Lawrence Gas Co. (Lawrence), Lynn Gas Co. (Lynn), Massachusetts Electric Co. (Mass Electric), Massachusetts Gas System (Mass Gas), Mystic Valley Gas Co. (Mystic Valley), The Narragansett Electric Co. (Narragansett), North Shore Gas Co. (North Shore), Northampton Gas Light Co. (Northampton), Norwood Gas Co. (Norwood), and Wachusett Gas Co. (Wachusett). NEES and the borrowing companies have designated sections 6(a), 7, 9(a), 10, and 12 of the Act and Rules 42(a) and 50(a)(5) promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transactions.

The borrowing companies propose to issue, from time to time through December 31, 1971, unsecured short-term promissory notes to banks, to dealers in commercial paper, and/or to NEES or Mass Gas. The aggregate amount of loans to the borrowing companies by NEES and Mass Gas to be outstanding at any one time will not exceed \$35 million and \$15 million, respectively. Borrowings by Mass Electric from banks and NEES in the proposed maximum amount of \$28 million will be reduced by the principal amount of any commercial paper at the time outstanding. The proceeds of the proposed borrowings are to be used by each borrowing company to pay its then outstanding notes payable to banks, dealers in commercial paper, and/or to NEES or Mass Gas at or prior to maturity thereof, and to provide new money for capital expenditures or reimburse its treasury therefor.

The proposed notes to banks and/or NEES or Mass Gas will bear interest at not in excess of the prime rate in effect at the time of issue with the exception of notes to the First National City Bank of New York which will be at the prime rate plus three-quarters of 1 percent. Said notes will mature in less than 1 year from the date of issue and in any event not later than March 31, 1972, and will be prepayable at any time, in whole or in part, without premium.

The following table shows for each borrowing company the estimated maximum amount of notes to be outstanding with banks and/or with NEES or Mass Gas at any one time:

ESTIMATED MAXIMUM SHORT-TERM NOTES TO BE OUTSTANDING AT ANY ONE TIME

 2 The First National Bank of Boston, Boston, Mass.
 3 National Bank of Lebanon, Lebanon, N.H.
 4 Industrial National Bank of Rhode Island, Providence, R.I.
 5 Rhode Island Hospital Trust National Bank, Providence, R.I.
 6 Worcester County National Bank, Worcester, Mass.
 7 Guaranty Bank and Trust Co., Worcester, Mass.
 8 The Mechanics National Bank, Worcester, Mass.
 9 South Shore National Bank, Quincy, Mass.
 10 Middlesex Bank, N.A., Everett, Mass.
 11 NEES only.

It is proposed that certain of the borrowing companies may prepay their notes to NEES or Mass Gas, in whole or in part, with borrowings from banks or from the sale of commercial paper, or that their borrowings from banks may be prepaid, in whole or in part, with borrowings from NEES, Mass Gas, or from the sale of commercial paper. In the event of borrowings from banks at a higher interest rate or the sale of commercial paper at a higher effective interest cost, to prepay notes to NEES or Mass Gas, NEES or Mass Gas will credit the borrowers for any excess interest from the date of issuance of the new notes or commercial paper to the nominal maturity date of the notes to NEES or Mass Gas being prepaid. Conversely, in the event of borrowing from NEES or Mass Gas to prepay notes to banks, the interest rate of the notes issued to NEES or Mass Gas will be the lower of (1) the interest rate on the notes being prepaid or (2) the prime interest rate then in effect (in the case of the gas companies borrowing from the First National City Bank of New York, the prime interest rate then in effect plus three-quarters of 1 percent), but with respect to (1) only to the maturity date of the notes so prepaid, and thereafter at the prime interest rate in effect (in the case of the gas companies borrowing from the First National City Bank of New York, the prime interest

rate then in effect plus three-quarters of 1 percent) at the time the new notes are issued.

Each of the borrowing companies proposes that if any permanent financing is done prior to the maturity of the indebtedness to be issued hereunder, it will apply the proceeds therefrom, in excess of amounts used in connection with refunding other outstanding securities at the principal amount or par value thereof, in reduction of, or in total payment of, note indebtedness then outstanding; and that, except in the case of Mass Electric and Narragansett, the maximum amount of note indebtedness proposed to be outstanding hereunder will be reduced by the amount of such proceeds, other than proceeds used for refunding purposes of such permanent financing.

In addition, Mass Electric proposes to issue and sell commercial paper not to exceed \$28 million to Lehman Commercial Paper Inc. (Lehman) and/or A. G. Becker & Co., Inc. (Becker), dealers in commercial paper. The commercial paper will be issued during the period through December 31, 1971, will have varying maturities of not more than 270 days after the date of issue (and in any event will mature on or prior to Mar. 31, 1972), will be sold in varying denominations of not less than \$50,000 and not more than \$1 million, and will not by their terms be prepayable prior to maturity. Such notes will be issued and sold by Mass Electric directly to Lehman and/or Becker at a discount which will not exceed the discount rate prevailing at the date of issuance for commercial paper of comparable quality and like maturity. The effective interest cost will not exceed the effective interest cost prevailing at the date of issue for borrowings from The First National Bank of Boston (First National), except that, in order to obtain maximum flexibility, commercial paper may be issued with a maturity of not more than 90 days from the date of issue with an effective cost in excess of such effective interest cost from First National.

Lehman and Becker, as principals, will reoffer the commercial paper at a discount rate not more than one-eighth of 1 percent per annum less than the prevailing discount rate to the issuer. The notes will be reoffered by Lehman and Becker to not more than 100 of their respective customers whose names appear on nonpublic lists prepared in advance by Lehman and Becker. No additions will be made to such lists of customers which are composed of institutional investors. It is expected that such commercial paper will be held to maturity by the purchasers from the dealers, but, if any such purchaser wishes to resell prior to maturity,

Lehman or Becker, as the case may be, pursuant to an oral repurchase agreement will repurchase the paper for resale to others on said lists of customers.

Mass Electric requests exception of the sale of its commercial paper notes from the competitive bidding requirement of Rule 50 pursuant to section (a) (5) thereof, because: (a) The commercial paper to be issued will have maturities of not more than 9 months; (b) the effective interest cost thereon will not exceed the effective interest cost for borrowings from First National (with the exception above stated); (c) the current rates for commercial paper for prime borrowers such as Mass Electric are readily ascertainable by reference to daily financial publications and do not require competitive bidding in order to determine the reasonableness thereof; and (d) it is not practical to publish invitations for bids for commercial paper.

It is also proposed that the certificates of notification under Rule 24 regarding all of the proposed transactions be filed quarterly.

It is stated that there are no fees or commissions to be paid in connection with the proposed transactions and that incidental services in connection with the proposed transactions will be performed, at cost, by New England Power Service Co., an affiliated service company; such cost is estimated not to exceed \$200 for each applicant-declarant, an aggregate of \$2,600.

Appropriate action has been taken by the Public Utilities Commission of New Hampshire with respect to the notes proposed to be issued by Granite. It is stated that no further action by any regulatory commission, other than this Commission, is necessary with respect to the proposed transactions.

Notice is further given that any interested person may, not later than February 18, 1971, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon New England Electric System at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulation promulgated under the Act, or the Commission may grant exemption from its rules under the Act as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who re-

quest a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

INTERSTATE COMMERCE COMMISSION

[Notice No. 8]

MOTOR CARRIER, BROKER, WATER CARRIER, AND FREIGHT FORWARDER APPLICATIONS

JANUARY 29, 1971.

The following applications are governed by Special Rule 247¹ 1100.247 of the Commission's general rules of practice (49 CFR, as amended), published in the FEDERAL REGISTER issue of April 20, 1966, effective May 20, 1966. These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after date of notice of filing of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(d)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline,

¹ Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 1247(d)(4) of the special rules, and shall include the certification required therein.

Section 247(f) of the Commission's rules of practice further provides that each applicant shall, if protests to its application have been filed, and within 60 days of the date of this publication, notify the Commission in writing (1) that it is ready to proceed and prosecute the application, or (2) that it wishes to withdraw the application, failure in which the application will be dismissed by the Commission.

Further processing steps (whether modified procedure, oral hearing, or other procedures) will be determined generally in accordance with the Commission's General Policy Statement Concerning Motor Carrier Licensing Procedures, published in the *FEDERAL REGISTER* issue of May 3, 1966. This assignment will be by Commission order which will be served on each party of record.

The publications hereinafter set forth reflect the scope of the applications as filed by applicants, and may include descriptions, restrictions, or limitations which are not in a form acceptable to the Commission. Authority which ultimately may be granted as a result of the applications here noticed will not necessarily reflect the phraseology set forth in the application as filed, but also will eliminate any restrictions which are not acceptable to the Commission.

No. MC 923 (Sub-No. 10), filed December 23, 1970. Applicant: MEADE TRANSPORT, INC., 2021 Mill Avenue, Owensboro, KY 42301. Applicant's representatives: A. O. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except classes A and B explosives, household goods as defined by the Commission, and those requiring special equipment), (1) between Owensboro, Ky., and Nashville, Tenn., from Owensboro over U.S. Highway 431 to Springfield, Tenn., thence over U.S. Highway 41 to Nashville, and return over the same route, serving the intermediate point of Russellville, Ky., and (2) between Owensboro, Ky., and

Nashville Tenn., from Owensboro over U.S. Highway 231 to junction U.S. Highway 231 and junction Interstate Highway 65 near Bowling Green, Ky., thence over Interstate Highway 65 to Nashville, and return over the same route, as an alternate route in connection with applicant's presently held regular route authority, for operating convenience only, serving no intermediate points. Restriction: Service over the above routes is restricted against the handling of traffic originating at, destined to, or interchanged at, Nashville, Tenn., and points within its commercial zone, on the one hand, and, on the other, Russellville and Louisville, Ky., and points within their respective commercial zones, and points on and north of U.S. Highway 40. Note: If a hearing is deemed necessary, applicant requests it be held at Owensboro, Ky.

No. MC 2368 (Sub-No. 28), filed January 13, 1971. Applicant: BRALLEY-WILLET TANK LINES, INC., 2212 Deepwater Terminal Road, Post Office Box 495, Richmond, VA 23204. Applicant's representative: D. V. Bralley (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid waste*, in bulk, in tank vehicles, between points in North Carolina, South Carolina, Virginia, West Virginia, Tennessee, Delaware, Maryland, Pennsylvania, and New Jersey. Note: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 2368 (Sub-No. 29), filed January 13, 1971. Applicant: BRALLEY-WILLET TANK LINES, INC., 2212 Deepwater Terminal Road, Post Office Box 495, Richmond, VA 23204. Applicant's representative: G. C. Kirkmeyer, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Adipic acid*, dry, in bulk, from Hopewell, Va., to Natrium, W. Va., and Perth Amboy, N.J. Note: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 2567 (Sub-No. 14), filed December 7, 1970. Applicant: BELBEY TRANSFER COMPANY, a corporation, 520 Belleville Turnpike, Kearny, NJ 07032. Applicant's representative: Bert Collins, 140 Cedar Street, New York, NY 10006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Electrical equipment*, other than household appliances, and *equipment, materials, and supplies* used in connection with the manufacture, installation, and maintenance of said commodities (except in bulk), (1) between the plantsite of Westinghouse Electric Corp., Hillside, N.J., and points in Union, Essex, Bergen, Hudson, and Morris Counties, N.J., on the

one hand, and, on the other, points in Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Newport News, Va., and Washington, D.C.; and (2) between plantsite of Westinghouse Electric Corp., Hillside, N.J., and points in Union, Essex, Bergen, Hudson, and Morris Counties, N.J., and Richmond, Va.; Cincinnati, Cleveland, Marietta, and Akron, Ohio, and Bloomington, Ind. Note: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 2860 (Sub-No. 94), filed January 20, 1971. Applicant: NATIONAL FREIGHT, INC., 57 West Park Avenue, Vineland, NJ 08360. Applicant's representative: Alvin Altman, 1776 Broadway, New York, NY 10019. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass containers*, from Waxahatchie, Tex., to points in New Orleans, La. Note: Applicant states that the requested authority can be tacked with its existing authority but indicates that it has no present intention to tack, and therefore does not identify the points or territories which can be served through tacking. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y., or Washington, D.C.

No. MC 3854 (Sub-No. 15) (Amendment), filed November 30, 1970, published in the *FEDERAL REGISTER* issue of December 30, 1970, and republished as amended, this issue. Applicant: BURTON LINES, INC., Post Office Box 11306, East Durham Station, Durham, NC 27703. Applicant's representative: Edward G. Villalon, 1735 K Street NW., Washington, DC 20006. A notice of proposed revision of 29 CFR Part 60 was published in the FEDERAL REGISTER on November 17, 1970 (35 F.R. 17665). Previous notices of proposed amendments to various portions of 29 CFR Part 60 were published in the FEDERAL REGISTER on May 28, 1970 (35 F.R. 8369), May 27, 1970 (35 F.R. 8291), and on June 5, 1969 (34 F.R. 8972). After consideration of all matters presented by interested persons concerning these proposals, I have decided to and do hereby revise the regulations set forth in Part 60 as set forth below, to be effective upon publication in the FEDERAL REGISTER (2-4-71). The changes are not applicable to requests and applications received prior to the effective date.

The amendments contained herein relate to matters within the Secretary's discretion and in large part constitute a clarification and restatement of existing procedures and policies. In addition, the amendments which change findings regarding certain occupations and the procedural treatment of these occupations reflect changes in the availability of U.S. workers and any additional advance notice of these regulatory changes would be contrary to the public interest.

Part 60 is revised to read as follows:

- Sec.
- 60.1 Purpose and scope.
 - 60.2 Determinations and certification schedules.
 - 60.3 Requests for certification.
 - 60.4 Certification determinations and review.
 - 60.5 Validity.
 - 60.6 Matters to be considered.
 - 60.7 Schedules.

AUTHORITY: The provisions of this Part 60 are issued under section 212(a)(14), as amended, 66 Stat. 181; 8 U.S.C. 1182.

§ 60.1 Purpose and scope.

The Immigration and Nationality Act provides, among other things, that each alien wishing to immigrate to the United States must be eligible to receive a visa as prescribed by regulations of the Department of State and must be admissible into the United States as prescribed by regulations of the Immigration and Naturalization Service. An alien who seeks to immigrate for the purpose of employment instead of on another basis, such as close relationship to U.S. citizens or permanent residents, is ineligible to receive a visa and is excluded from admission into the United States unless the Department of Labor has determined and certified to the Department of State and to the Immigration and Naturalization Service that qualified U.S. workers are not available and that his employment will not adversely affect wages and working conditions of the workers in the United States similarly employed. This certification by the Department of Labor is popularly referred to as a "labor certification".

The regulations in this Part set forth the details in particulars of labor certification processing as arranged among the Departments of State, Justice, and Labor.

(a) Sections 101(a)(27)(A) and 203 of the Immigration and Nationality Act were amended on October 3, 1965, to require as a condition to the admission of certain "special immigrants", any non-preference immigrant under paragraph 203(a)(8) and any preference immigrant under paragraph 203(a)(3) or 203(a)(6) that the alien be a beneficiary of a determination and certification made by the Secretary of Labor pursuant to the provisions of section 212(a)(14) of the Act. Accordingly, the immigrants for whom the 212(a)(14) certification is made a condition precedent to admission to the United States are as follows:

(1) Third preference immigrants who are described as "qualified immigrants who are members of the professions, or who because of their exceptional ability in the sciences or the arts will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States." (section 203(a)(3))

(2) Sixth preference immigrants who are described as "qualified immigrants who are capable of performing specified skilled or unskilled labor, not of a temporary or seasonal nature, for which a shortage of employable and willing persons exists in the United States." (section 203(a)(6))

(3) Nonpreference immigrants who are described as "other qualified immigrants strictly in the chronological order in which they qualify." (section 203(a)(8))

(4) Special immigrants who are described as "an immigrant[s] who was born in any independent foreign country of the Western Hemisphere or in the Canal Zone and the spouse and children of any such immigrant, if accompanying, or following to join him." (section 101(a)(27)(A))

(b) The determination and certification required to be made by the Secretary of Labor is described in section 212(a)(14) of the Act as follows:

Except as otherwise provided in this Act, the following classes of aliens shall be ineligible to receive visas and shall be excluded from admission into the United States:

(14) Aliens seeking to enter the United States, for the purpose of performing skilled or unskilled labor, unless the Secretary of Labor has determined and certified to the Secretary of State and to the Attorney General that (A) there are not sufficient workers in the United States who are able, willing, qualified, and available at the time of application for a visa and admission to the United States and at the place to which the alien is destined to perform such skilled or unskilled labor, and (B) the employment of such aliens will not adversely affect the wages and working conditions of the workers in the United States similarly employed. The exclusion of aliens under this paragraph shall apply to special immigrants defined in section 101(a)(27)(A) (other than the parents, spouses, or children of U.S. citizens or of aliens lawfully admitted to the United States for permanent residence), to preference immigrant aliens described in section 203(a)(3) and (6), and to nonpreference immigrant aliens described in section 203(a)(8);

(c) The geographic applicability of this part is the United States, which, unless otherwise specifically indicated means the 50 States, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands of the United States.

(d) The addresses of the regional and other area offices of the Manpower Administration of the Department of Labor follow, together with a list of the States and Territories in each region. The addresses of the local offices of the several State Employment Services can be obtained at the office of the appropriate Regional Manpower Administrator.

§ 60.2 Determinations and certification schedules.

(a) **Determinations.** To facilitate the processing of requests for labor certification, Schedules and lists are provided below which contain determinations made by the Secretary of Labor, pursuant to the requirements of section 212(a)(14) of the Immigration and Nationality Act, that:

(1) For the categories of employment described in Schedule A at § 60.7 except for any geographic limitations therein set forth, there are not sufficient workers who are able, willing, qualified, and available for employment and the employment of aliens in such categories in such areas will not adversely affect the wages and working conditions of workers in the United States similarly employed.

(2) For the categories of employment described in Schedule B at § 60.7 subject to, any geographic limitations therein set forth, the certification required by section 212(a) (14) cannot now be made.

(b) The Secretary may make such revisions of the Schedules and listings described in paragraph (a) of this section as he deems necessary and at such times as he deems appropriate upon his own initiative or upon the written request of any person setting forth reasonable grounds therefor. Requests for such revisions should be filed by mail with the Secretary of Labor, Washington, D.C. 20210.

§ 60.3 Requests for certification.

(a) Any alien seeking a certification pursuant to this part, or any person on behalf of such alien, whose category of employment is included in Schedule A shall file a Statement of Qualifications of Alien form in duplicate and fully documented with a U.S. Consular office abroad or with an Immigration and Naturalization Service office in the United States. If, after review, the Consular or Immigration Officer concludes that the alien's qualifications conform with the schedule requirements and occupational descriptions, he shall indicate on the form the occupation on Schedule A in which the alien qualifies and the certification made by the operation of the schedule shall be applicable.

(b) Any alien who qualifies as a professional or as one who has exceptional ability in the sciences or arts and whose category of employment is not included on Schedule A, or any person on behalf of such alien, shall file a Statement of Qualifications of Alien form in duplicate and fully documented with a U.S. Consular office abroad or with an Immigration and Naturalization Service office in the United States. When preference status is being requested pursuant to the provisions of section 204 of the Act, the Consular Officer shall review and forward the form and documentation to the Immigration and Naturalization Service; in all other cases the Consular Officer after review shall forward the form and documentation for labor certification determination to the office of the Manpower Administration of the U.S. Department of Labor for the area of the alien's intended residence. The Immigration Officer, upon determining that the alien qualifies as a professional or as one who has exceptional ability in the sciences or arts, shall forward the form and documentation for labor certification determination to the office of the Manpower Administration of the Department of Labor for the area of the alien's intended residence.

(c) Any alien whose category of employment is not included on Schedule A or on Schedule B or in paragraph (b) of this section shall apply for certification by having the prospective employer or the authorized representative of the employer file in duplicate a Statement of Qualifications of Alien form, a Job Offer for Alien Employment form, and where the alien is to "live at work", a fully documented Supplemental Statement for Live-At-Work Job Offers. The forms shall be filed with any local office of the State Employment Service serving the area where the alien will be employed. After a review of the forms and area labor market information pertaining to the availability of U.S. workers and to the prevailing wages and working conditions in the area of employment similar to the alien's intended employment, the State Employment Service shall forward the form and information to the office of the Manpower Administration of the U.S. Department of Labor for that area. A labor certification determination will be made based on the information submitted by the State Employment Service and any other applicable data available to the Manpower Administration area office.

(d) The filing of forms with and the processing of forms by a Consular office pursuant to paragraphs (a) and (b) of this section shall be in accordance with State Department regulations and procedures. The filing of forms with and the processing of forms by the Immigration and Naturalization Service pursuant to paragraphs (a) and (b) of this section shall be in accordance with Immigration and Naturalization Service regulations and procedures. Determinations by the Immigration and Naturalization Service as to whether an alien qualifies as a professional or as one who has exceptional ability pursuant to paragraphs (a) and (b) of this section shall, subject to review as provided by the Immigration and Naturalization Service regulations and procedures, be accepted as conclusive by the Department of Labor.

(e) Forms: Application for Alien Employment Certification.

(1) Statement of Qualifications of Alien—MA 7-50A (formerly ES-575A). This form provides for a description of the alien, including information regarding the alien's occupational qualifications and intended area of residence in the United States. It is to be completed by the alien applicant. (Because of changes in these regulations effectuated since the issuance of form MA 7-50A, there is no longer a requirement that question number 19 regarding placement and/or referral services be answered.)

(2) Job Offer for Alien Employment—MA 7-50B (formerly ES-575B). This form provides for a description of the alien's prospective employment in the United States. It is to be completed by a prospective employer. (Because of changes in these regulations effectuated since the issuance of form MA 7-50B, the note printed between items 3 and 4 of that form is modified to the extent that an employer is not subject to a denial of

certification on the ground of employing an alien who works without authorization.)

(3) Supplemental Statement for Live-At-Work Job Offers—MA 7-50C (formerly ES-575B, Supplement 1). This form provides for further description of the alien's prospective living and working conditions for jobs where the alien is required to live at the place of employment.

(4) Forms and instructions for filing are available at U.S. Consulates abroad, Immigration and Naturalization offices in the United States, and local offices of the various State Employment Services.

(5) Forms ES-575A, B, and B Supplement 1 will be accepted for initial processing until July 1, 1971.

(f) Documentation:

(1) The documents supporting an application for alien employment certification as a member of the professions or of an alien with exceptional ability in the sciences or arts, whose eligibility is based in whole or in part on high education, shall include a certified copy of the alien's school record. The record must show the period of attendance, major field of study and the degrees or diplomas awarded. If the alien has received a license or other official permission to practice his profession, the license or other official permit to practice must also be submitted. If the alien's eligibility is based on a claim of exceptional ability in the sciences or the arts, documentary evidence supporting the claim must be submitted by the applicant. Such evidence may attest to the unusual acclaim and either the national or international recognition accorded to the alien; that he has received a nationally or internationally recognized prize or award or won a nationally or internationally recognized competition for excellence for a specific product or performance or for outstanding achievement; or that he is a member of a national or international association of persons which maintains standards of membership recognizing outstanding achievement as judged by national or international experts in a specific discipline or field of endeavor. An affidavit attesting to an alien's exceptional ability in the sciences or the arts must set forth the name and address of the affiant, state how he has acquired his knowledge of the alien's qualifications and must describe in detail the facts on which the affiant bases his assessment of the alien's qualifications. If material published by or about the alien is submitted, it must be accompanied by information as to the date, place, and title of publication.

(2) If supporting documents are submitted in the original; no additional copies are required. If the return of an original document is desired, it should be accompanied by a photostatic or typewritten copy. Photostatic copies not accompanied by the original may be submitted, provided that they are certified as identical to the original document by an immigration or consular official or official custodian of the original. Documents not in the English language must

be accompanied by a translation, certified by the translator as to the accuracy of the translation and his competency to so translate.

§ 60.4 Certification determinations and review.

(a) Department of Labor determinations pursuant to paragraphs (b) and (c) of § 60.3 shall be made by the Certifying Officer appointed by the Regional Manpower Administrator (or the Administrator for the District of Columbia) of the Manpower Administration of the U.S. Department of Labor for the area wherein the employment is to occur.

(b) Requests for review of a denial of certification pursuant to paragraph (a) of this section and requests for review of a Consular Officer's decision under § 60.3(a) regarding the alien's qualifications may be made in writing to the Regional Manpower Administrator (or the Administrator for the District of Columbia) of the same area in which the denial occurred or, in the case of a Consular Officer's decision, of the area of the alien's intended residence. Such requests shall be made within 90 days of the denial of certification and shall: (1) Clearly identify the particular certification determination for which review is sought; (2) set forth the particular grounds on which the request is based; and (3) include all documents which accompanied the denial of certification.

(c) The Regional Manpower Administrator (or the Administrator for the District of Columbia) or his designated representative, who shall not have participated in the initial determination, shall carry out the review. Upon review, the Regional Manpower Administrator (or the Administrator for the District of Columbia) or his designated representative may order the issuance of a certification or may affirm the denial. The determination of the Regional Manpower Administrator (or the Administrator for the District of Columbia) shall be final.

(d) Notwithstanding any provision in this section to the contrary, applications for certification may be removed by the Department of Labor to the national office and may be determined in the national office by a Certifying Officer designated by the Manpower Administrator; applications for certification for alien employment in the Virgin Islands shall be determined by a Certifying Officer designated by the Manpower Administrator. Requests for review of a denial of certification made in the national office or in the Virgin Islands pursuant to this paragraph shall be made in writing to the Manpower Administrator, U.S. Department of Labor, Washington, D.C. 20210. Such review shall be consistent with the procedure set forth in paragraph (b) or (c) of this section and the determination upon review shall be final.

(e) Requests for review of a denial of certification based upon occupations in Schedule B in § 60.7 may be made in writing to the Assistant Secretary of Labor for Manpower, U.S. Department

of Labor, Washington, D.C. 20210, within 90 days of the denial of certification and shall: (1) Clearly identify the particular certification determination for which review is sought; (2) set forth the particular grounds on which the request is based; and (3) include all documents which accompanied the denial of certification.

§ 60.5 Validity.

(a) A labor certification issued pursuant to this part shall be valid for an indefinite period of time except that revalidation shall be required as provided in paragraph (b) of this section, and, notwithstanding any provision in this section to the contrary, no certification made pursuant to Group I of Schedule C or Schedule C—Precertification list previously issued pursuant to this part shall be valid beyond March 31, 1971.

(b) Labor certifications and revalidations of certifications in the categories of employment described below, including any geographic limitations, shall be valid for 1 year after the date that the certification was actually made and revalidation shall be required after that period; this provision shall be applicable to both new and outstanding certifications: Household Domestic Service work; Teaching; and Certifications made pursuant to Group I of Schedule C or Schedule C—Precertification List.

(c) The certification procedures in effect at the time a request for revalidation is made shall be followed in processing the revalidation request. Determinations will be made on the basis of the applicable labor market conditions which exist at the time of the request for revalidation. The original forms upon which initial certification was obtained should be submitted for revalidation. Any material changes in circumstances must be noted and initialed.

(d) Labor certifications made in a Regional Manpower Administration office or national office of the U.S. Department of Labor, shall be deemed to have been made as of the date a complete and proper application for alien employment certification is accepted for processing within the Employment Service system. For the purpose of this section, certifications made pursuant to Schedule A shall be considered to have been made on the date of acceptance by the Consular or Immigration Officer of evidence to establish that the alien's qualifications conform with the Schedule's occupational requirements for certification as set forth in § 60.3(a) above.

(e) The validity of: (1) A labor certification issued pursuant to § 60.3(a) shall be limited to the intended occupation as set forth on the Statement of Qualifications of Alien form and to the geographic areas set forth in Schedule A at § 60.7; (2) a labor certification issued pursuant to § 60.3(b) shall be limited to the intended occupation and to the geographic area of intended residence as set forth on the Statement of Qualifications of Alien form; and (3) a labor certification issued pursuant to § 60.3(c) shall be limited to the particular job and geo-

graphic location set forth on the Job Offer for Alien Employment form.

(f) The terms and conditions of the labor certification shall not be construed as preventing an immigrant properly admitted to the United States from subsequently changing his occupation, job, or area of residence.

(g) Certifications issued pursuant to this part are invalid if the representations upon which they are based are materially incorrect. Materially incorrect, for the purposes of this paragraph, means that if the correct facts had been known a certification could not have been issued pursuant to the requirements set forth at section 212(a)(14) of the Immigration and Nationality Act.

§ 60.6 Matters to be considered.

Prospective employment offered in accordance with § 60.3(c) will be deemed to adversely affect "wages" or "working conditions" of American workers within the meaning of section 212(a)(14) of the Act unless it appears:

(a) That such employment will be for wage rates no less than those prevailing for U.S. workers similarly employed in the area of employment: *Provided, however*, That such wages are not lower than any applicable wage rates prescribed by the Secretary of Labor pursuant to law as the minimum rates which will not adversely affect the wages of American workers similarly employed. Where available, such prevailing wages shall generally be the rates determined to be prevailing for the occupations and in localities involved pursuant to the provisions of the Davis-Bacon and related Acts (40 U.S.C. 276a), the McNamara-O'Hara Service Contract Act (41 U.S.C. 351), or the National Foundation on the Arts and Humanities Act of 1965 (20 U.S.C. 954(j), § 505.3 of this title), or set forth on Wage Board rate schedules applicable to Federal installations in the area (5 U.S.C. 5341). Where a current determination under one of these laws is not applicable, the prevailing wage rate will be determined in accordance with the current criteria established pursuant to the Davis-Bacon Act in Part 1 of this Title;

(b) That such employment will include the furnishing of fringe benefits that prevail for U.S. workers similarly employed in the area of employment;

(c) That such employment will involve adherence to prevailing working conditions including customs in the area of employment regarding the furnishing of board, lodging, and other facilities;

(d) That such employment will not involve positions (1) that are vacant because the former occupants are on strike or are being locked out in the course of a labor dispute or (2) the filling of which is at issue in a labor dispute;

(e) That such employment will not involve any discrimination with regard to race, creed, color, national origin, age, or sex; and,

(f) That such employment or any term or condition thereof is not contrary to any provisions of Federal, State, or local law.

§ 60.7 Schedules.

SCHEDULE A

Group I: Persons who received an advanced degree in any of the following specialties from an institution of higher learning accredited in the country where the degree was obtained (equivalent to a Ph.D. or master's degree conferred by American colleges or universities):

Dietetics.
Medicine and Surgery.
Nursing.
Pharmacy.
Physical Therapy.

Group II: Persons who have received a degree conferred by an accredited institution of higher learning in any of the following specialties (equivalent to the bachelor's degree conferred by American colleges or universities) or have experience or a combination of experience and education equivalent to such degree:

Dietetics.
Nursing.
Pharmacy.
Physical Therapy.

Group III: (a) Any person of any religious denomination whose regular profession or occupation is to conduct religious services, which he is authorized by his denomination to perform, and who is seeking admission to the United States in order to engage principally in such work.

(b) Any person of any religious denomination having a religious commitment, such as a Monk, Nun, Brother, Missionary, and others, who is seeking admission to the United States to perform the duties required of him by virtue of such commitment.

(c) Any other person seeking admission to the United States to perform duties related to the nonprofit operation of a religious organization (1) if the duties which he will perform involve special skills, training, and experience which the alien possesses and which are related to the religious objectives of the organization and (2) if he intends to be engaged principally (more than 50 percent of his working time) in such duties. Examples of persons coming within this subgroup are cantors and translators of religious tracts or texts who have the special capability of conveying through the translation the spiritual message to which such tracts or texts are directed and who will be engaged in such endeavors.

An operation may be considered nonprofit for purposes of Group III if the receipts from the operation will be used exclusively in furtherance of the philanthropic or religious purposes of the organization.

OCCUPATIONAL DEFINITIONS

These definitions are intended as descriptive guidelines and not as mandatory qualification requirements.

Dietetics

The application of the principles of nutrition to plan menus and diets and direct the preparation and serving of meals. Includes activities involved with service programs designed to feed individuals and groups with special nutritional requirements in schools, restaurants, and other institutions. Also includes participation in research in the field of nutrition.

Medicine and Surgery

The application of the art and science of medicine and surgery to the diagnosis, prevention, and treatment of diseases and injuries in man, disorders of the mind, and the treatment of women during pregnancy; and research into the causes, transmission, and control of disease and other ailments. Includes the practice of medicine, oste-

opathy, psychiatry, and ophthalmology. May specialize in treating a specific area of the body, or a particular disease, sex, or age group. *Provided*, That certification under this category shall apply only to those physicians and surgeons whose medical degrees or qualifications were conferred by a medical school in the United States and Canada and such other physicians and surgeons who (a) submit evidence from the licensing authority of the State of the alien's intended employment that the alien has met all of the requirements for licensure or for admittance to the licensure examination in that State; or (b) submit evidence from an institution providing approved medical internship or residency training that the alien has met all of the requirements for appointment to an internship or residency and is being offered such appointment; or (c) submit evidence that they have passed the examination of the Educational Council for Foreign Medical Graduates; or (d) submit evidence of having received an appointment to engage in medical teaching, research, or laboratory work that will not involve direct patient care.

Nursing

The application of the art and science of nursing which reflects comprehension of principles derived from the physical, biological, and behavioral sciences. Nursing generally includes the making of clinical judgments concerning the observation, care, and counsel of persons requiring nursing care; the administering of medicines and treatments prescribed by the physician or dentist; the participation in activities for the promotion of health and the prevention of illness in others.

Preparation for nursing practice is generally obtained through an organized program of study approved by a governmental or other competent authority in the alien's country. High school graduation or its equivalent is usually a prerequisite. A program of study generally includes theory and practice in clinical areas such as: Obstetrics, surgery, pediatrics, psychiatry, and medicine.

Pharmacy

The compounding of prescriptions written by physicians, dentists, and other authorized medical practitioners; and the bulk selection, compounding, dispensing, and preservation of drugs and medicines.

Physical Therapy

The treatment of patients with disabilities, disorders, and injuries to relieve pain, develop or restore function, and maintain performance, using physical means, such as exercise, massage, heat, water, light, and electricity, as prescribed by a medical doctor.

OCCUPATIONAL DEFINITIONS

Assemblers

Perform one or more repetitive tasks to assemble components and subassemblies using hand or power tools to mass produce a variety of components, products or equipment. Involves such activities as riveting, drilling, filing, bolting, soldering, spot welding, cementing, gluing, cutting, and fitting. May use clamp or other work aids to hold parts during assembly. May inspect or test components. May tend previously set-up or automatic machines.

Attendants, Parking Lot

Park automobiles for customers in parking lots or garages and collect fees based on time span of parking.

Attendants (Service Workers such as Personal Service Attendants, Amusement and Recreation Service Attendants)

Perform a variety of routine tasks attending to the personal needs of customers at such places as amusement parks, bath houses, clothing checkrooms, and dressing rooms. Includes such tasks as taking and issuing tickets, checking and issuing clothing and supplies, cleaning premises and equipment, answering inquiries, checking lists, and maintaining simple records.

Automobile Service Station Attendants

Service automotive vehicles with fuel, lubricants, and automotive accessories at drive-in service facilities. Also, compute charges and collect fees from customers.

Bartenders

Prepare, mix, and dispense alcoholic beverages for consumption by bar customers. Also, compute and collect charges for drinks.

Bookkeepers II

Keep records of one facet of an establishment's financial transactions. Responsible for maintaining one set of books, and specialize in such areas as accounts-payable, accounts-receivable, or interest accrued rather than a complete set of records.

Bus Boys

Facilitate food service in an eating place by performing such tasks as removing dirty dishes, replenishing linen and silver supplies, serving water and butter to patrons, and cleaning and polishing equipment.

Cashiers

Receive payments made by customers for goods or services, make change, and give receipt. Involves such activities as operating cash register, balancing cash accounts, preparing bank deposits and other related duties.

Chauffeurs and Taxicab Drivers

Drive automobiles to convey passengers according to their instructions.

Charwomen and Cleaners

Keep premises of commercial establishments, office buildings, or apartment houses in clean and orderly condition by performing such tasks as mopping and sweeping floors, dusting and polishing furniture and fixtures, and vacuuming rugs. Work according to set routine.

Clerks, General

Perform a variety of routine clerical tasks not requiring knowledge of systems or procedures. Involves such activities as copying and posting data, proofreading records or forms, counting, weighing, or measuring material, routing correspondence, answering telephones, conveying messages, and running errands.

Clerks, Hotel

Perform a variety of routine tasks to accommodate hotel guests. Involves such activities as registering guests, dispensing keys, distributing mail, collecting payments, and adjusting complaints.

Clerks and Checkers, Grocery Stores

Itemize, total, and receive payment for purchase in grocery stores, usually using cash register. Often assists customer in locating items, stock shelves, and keep stock-control and sales-transaction records.

Clerk Typists

Perform general clerical work requiring use of typewriter in majority of duties. Involves such activities as typing reports, bills, application forms, shipping tickets, and other matters from clerical records; filing records and reports, posting information to records, sorting and distributing mail, answering phone and similar duties. (Combines typing and filing, sorting mail, answering the telephone, and other general office work.)

Cooks—Short Order

Prepare and cook to order all kinds of short-preparation-time foods. May involve such activities as carving meats and filling orders from a steam-table; preparing sandwiches, salads, beverages; and serving meals over a counter.

Counter and Fountain Workers

Serve food to patrons at lunchroom counters, cafeterias, soda fountains, or similar public eating places. Take orders from customers and frequently prepare simple items, such as dessert dishes; itemize and total checks; receive payment and make change; and clean work area and equipment.

Electric Truck Operators

Drive gasoline- or electric-powered industrial trucks or tractors equipped with fork-lift, elevating platform, or trailer hitch to move and stack equipment and materials in a warehouse, storage yard, or factory.

Elevator Operators
